

Beretta
A TRADITION OF EXCELLENCE SINCE 1526

1201 F / 1201 FP

ENGLISH

The new model 1201 F offers important improvements in comparison to the previous model (1200 F).

- Barrels are now available in 67, 71 and 76 cm. (26", 28" or 30")
- Raised ventilated rib
- Mobilchoke® interchangeable chokes on request
- Variable length of pull by using modular spacers between stock and recoil pad
- Variable heel drop (3 measurements) by using the appropriate modification set (plate+spacer)

Version 1201 FP differs from model 1201 F as follows:

- Ribless barrel 52 cm. long, cylinder choking (C****), adjustable rear sight, blade front sight
- Greater capacity magazine (6 rounds) with protection sleeve

STOCK DROP MODIFICATION

Both models 1201 F and 1201 FP are normally factory set with a heel drop of 60 mm.

In order to modify the drop it is necessary to use the appropriate modification set consisting of a metal plate and a plastic spacer.

Available sets as follows:

- 60 mm. set (factory set)
- 55 mm. set on request
- 50 mm. set on request

It is advised to have the operation carried out by a competent gunsmith (use a 13 mm. hexagonal tube spanner, after removing rubber recoil pad with a medium sized cross-point screwdriver).
