BERETTA
500 YEARS. ONE PASSION.

FIELD GRADE SHOTGUNS

At Beretta, we think of shotguns as works of art. They must not only be perfectly suited for their purpose in the field, but they must be authentic, beautiful and a joy to own. Therefore, Beretta shotguns continue to be “the real thing” for hunters who seek a thrill every time they open their gun-case, no matter if hunting season is still months away.

Just like any well-crafted work of art, Beretta shotguns are always innovative: our passion for seeking new things is equally strong in the field and the engineering lab. But at Beretta, innovation never comes at the expense of tradition. This is why our firearms retain a timeless appeal even while incorporating the latest technology.

We design our art to fit different hunters’ tastes and budgets. Whether you seek a reliable semiautomatic shotgun to reach high-flying geese in the misty October marshes, or whether you prefer the classic feel of a hand-engraved over-and-under for upland quail, there is a Beretta shotgun that is right for you.

XTREMA2

In 2002, Beretta introduced the A391 Xtrema. This gun quickly garnered Field & Stream's "Best Gun of the Year Award," Guns & Ammo's "Editor's Award for Gun of the Year" and American Rifleman's "Bull's Eye Award." One of the reasons it received such widespread acclaim is that no other gun on the market has more recoil-reduction features than the Xtrema.

Xtrema2

In the relentless pursuit of excellence, our engineers have once again set the benchmark for a "do-it-all" shotgun in the form of the new Xtrema2. The Xtrema2 features: Soft shooting gas operation; An integrated spring-mass recoil reducer; Optima-bore overbored barrel; Kick-off recoil reduction.

KICK-OFF

TWO SPACERS SUPPLIED ALLOW FOR THE PERFECT LENGTH OF PULL.

NEW TRIGGER GROUP WHICH PROVIDES FOR A SHORTER TRIGGER TRAVEL, A CRISP, LIGHT PULL, AND QUICK RESET.

	A391 XTREMA2 3.5
Action	Semiautomatic gas operation with two-lug rotating bolt and self-compensating gas valve
Gauge	12
Chamber	3½"
Stock/Fore-end	Synthetic with rubber inlays
Stock Drop - Comb	1.34"
Stock Drop - Heel	2.36"
Recoil Pad	Gel-Tek, smooth
Safety	Cross-bolt
Trigger	Black
Fore-end	Round
Rib Type	Flat ¼" x ¼"
Sight	Metal Front Bead
Weight	7.8 lbs
Carry Case	Yes

AQUA

This new shotgun features Aqua technology for extreme environmental protection. All internal and external metallic components are constructed of advanced corrosive resistant materials. This means that even the coastal salt-spray that would ruin a traditional shotgun on a waterfowl outing will not damage this gun.

XTREMA2

Furthermore, we have redesigned the grip and fore-end to be even more ergonomic. Enlarged rubber molded inserts allow for greater grip-surface and minimize transmission of vibrations. The trigger has also been improved, providing for extremely crisp and light pull and short travel for quick follow-up shots.

The Xtrema2 was designed from the outset to work hard for you. The extended interlocking barrel tang maximizes rigidity and strength, while its two-lug rotary bolt-head locks up “bank vault” tight.

Xtrema2

Before and after the hunt, the Xtrema2 is easy to assemble and disassemble thanks to its modular sub-assembly design. The breech-bolt/action sleeve is a complete sub-assembly and stays assembled when removed from the gun, while the self-cleaning gas piston can be removed for inspection.

NEW FORE-END SHAPE WITH FLUTING, IMPROVES GUN HANDLING. IMPROVED GRIP AREA WITH SPECIAL RUBBER INSERTS TO IMPROVE CONTROL AND ABSORB VIBRATIONS.

USING ACCELERATED SALT SPRAY TESTING, UNPROTECTED STEEL BARREL SECTION (BELOW) SHOWS CORROSIVE EFFECTS WHILE THE AQUA-TECHNOLOGY PROTECTED BARREL LOOKS BRAND NEW.

AQUA**KICK-OFF**

OPTIONAL NEW KICK-OFF REDUCTION SYSTEM (PATENT PENDING) FEATURES TWO HYDRAULIC RECOIL DAMPERS INCORPORATED INTO STOCK “SPACER” UNIT. TESTED AND PROVEN TO RELIABLY OPERATE UNDER THE HARSHTEST CLIMATE EXTREMES.

XTREMA2

From this next generation award-winning platform, the Xtrema2 will prove to be a reliable hunting partner in the waterfowl marshes or your favorite turkey clearing.

AL391 TEKNYS

Nickeled frames have been a popular feature of double guns for many years. The AL391 Teknys has adopted that look and included the proven self compensating system of the Urika family. If previous autoloaders just weren't distinctive enough for you, Teknys is your gun! Its silvery receiver is ornamented by graceful lines that blend seamlessly into the curves of the stock, which has its own distinctive checkering pattern. The receiver top is matte-finished to reduce glare, contrasting attractively with the polished sides and golden trigger.

AL 391 TEKNYS

The trigger guard is made of glass-reinforced technopolymer, a modern material that is self-lubricating, warmer feeling to the touch in cold weather, and impact resistant. Trigger guards are a typical wear point for traditional blued guns; the Teknys guard will retain its appearance through years of use in the toughest weather. The Teknys combines the best of modern engineering and materials science with the centuries-old Beretta tradition of craftsmanship and design excellence.

AL391 TEKNYS
J391T18

BOTH STYLE AND SUBSTANCE DEFINE THE TEKNYS WITH LINES AND MATERIALS THAT STAND OUT FROM THE CROWD.

Wood
X-TRA

SEE PAGE 37 FOR X-TRA WOOD
PROGRAM DETAILS.

BERETTA'S SELF-COMPENSATING GAS SYSTEM MEANS NO O-RINGS OR PISTONS TO ADJUST WHEN SWITCHING LOADS. THIS PROVEN GAS SYSTEM DIVERTS GAS OUT A VENT AT THE BOTTOM TIP OF THE FORE-END TO PROVIDE JUST THE RIGHT PRESSURE TO CYCLE THE GUN.

TRUGLO

AL391 TEKNYS

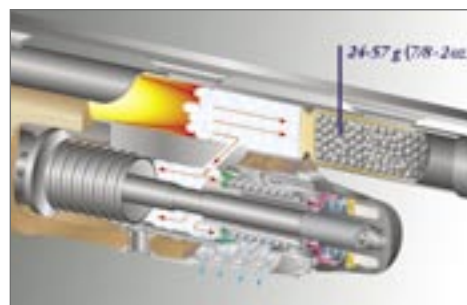

The distinctive Teknys receiver is complemented by Beretta's X-tra Wood waterproof wood enhancement process. An X-tra Wood stock has the look and grain pattern of premium-grade walnut, but with weather resistance that approaches synthetic stocks. The stock looks right at home with the luxurious Teknys metal work, but you won't be afraid to take it out in the harshest conditions (for more on X-tra Wood, see page 37). The butt stock of the 12-gauge model is recessed to accommodate a Beretta recoil reducer that is a little brother of the unit that helps tame 3½" 12-gauge recoil in the A391 Xtrema2 3.5. A patented Gel-Tek recoil pad dampens recoil even more. You can personalize the fit of your Teknys with a set of stock spacers that allow adjustment of drop and cast.

All 12-gauge Teknys shotguns are fitted with Beretta's Optima-Bore overbored barrels for recoil reduction and more even pattern distribution. Five Optima-Choke flush tubes, ranging from cylinder bore to full choke are supplied with each gun. A TruGlo Tru-Bead fiber optic luminous front sight comes with two interchangeable colored fibers to adapt the Teknys to any target background. This distinguished field gun is presented in a fitted, lined polypropylene case that keeps all the gun's many supplied accessories in their places. If you've wanted an autoloading shotgun that makes a personal statement in any company, examine Beretta's AL391 Teknys—it will satisfy the most exacting requirements.

AL391 TEKNYS

AL391 TEKNYS GOLD

To meet the requirements of the most discriminating autoloader fan, Beretta offers the AL391 Teknys Gold. This distinctive sporting arm features a select oil-finished walnut buttstock and fore-end, with attractive and unique green enamel inlay at the wrist that continues the curvilinear theme of the receiver. The polished side panels are complimented by deeply engraved hunting scenes, while the receiver top is matte-finished for a glare-free sighting plane. The bolt and shell

AL 391 TEKNYS

carrier are engine-turned for a jeweled look that complements the decoration. The Teknys Gold is not just for looks, either: it will cycle ammunition ranging from feathery target loads to thumping 12-gauge 3" magnums. When you're shooting the hardest-kicking 12-gauge ammo, install the 8.5-ounce recoil reducer: it's a smaller version of the Spring-Mass system used in the A391 Xtrema 3.5.

AL391 TEKNYS GOLD
J391T36

THE BUTTSTOCK CAN BE ADJUSTED FOR DROP AND CAST WITH A SUPPLIED SPACER KIT.

A GREEN ENAMEL INLAY AT THE WRIST GIVES THE TEKNYS A DISTINCTIVE LOOK.

AN OPTIONAL 8.5-OUNCE RECOIL REDUCER CAN BE INSTALLED (12-GAUGE MODELS ONLY) TO HELP TAME THE RECOIL OF HARD-KICKING WATERFOWL OR TURKEY LOADS (SOLD SEPARATELY).

AL391 TEKNYS GOLD

Recoil control is a priority of the Teknys Gold, with Beretta's Optima-Bore overbored barrel that softens recoil and improves pattern performance. Five flush Optima-Choke tubes are supplied: cylinder, improved cylinder, modified, improved modified and full. A TruGlo Tru-Bead fiber optic luminous front sight tops the floating ventilated rib. Two interchangeable fibers are supplied to make the Tru-Bead stand out against any background. The select walnut buttstock is attractively

capped by a Gel-Tek recoil pad and can be adjusted for drop and cast with a supplied kit of spacers. A gun this good needs to be protected, and the AL391 Teknys Gold is presented in a fitted, lined polypropylene case that has compartments for all the accessories that are included with the gun. The Teknys Gold brings unmatched design and prestige to the shooter who prefers an autoloading shotgun.

MOLDED CASE INCLUDES:

- 5 CHOKE TUBES
- CHOKE TUBE WRENCH
- SLING SWIVELS
- BERETTA OIL

AL391 URIKA

This is the workhorse of the Beretta autoloading line; the AL391 Urika is available in a configuration that will answer any hunting challenge. Whether you like your shotgun in basic black or in the most up-to-date and effective camouflage pattern, there's a Urika for you. All AL391s have in common a self-compensating gas system that allows them to digest everything from the lightest target loads (guns with 28" barrels can even function with subsonic ammo) to the heaviest 2-ounce magnums.

Beretta's well-proven self-compensating gas system diverts excess gas out a vent located on the bottom of the fore-end, just behind the magazine cap. By venting the gas below the fore-end, the finish is not damaged nor does gas vent towards the shooter's face. The self-compensating gas system will provide just the right pressure to function the gun. The result? A smooth-shooting, long-lasting auto shotgun whose watchword is reliability.

AL39I URIKA

All 12-gauge Urikas are fitted with Beretta's Optima-Bore overbored barrels and flush Optima-Choke Plus tubes. Five tubes are provided with each gun: cylinder, improved cylinder, modified, improved modified and full. The Optima-Bore system reduces recoil and improves pattern performance by easing the shot charge's passage from cylinder to bore, limiting pattern-destroying shot deformation. The hammer-forged barrel is chrome-lined for corrosion resistance and easy

cleaning, and lengths range from 24" for turkey hunting to 28" for doves and waterfowling. All 12-gauge Urika models can be fitted with an optional recoil reducer whose design is based on the Spring-Mass recoil reduction system used in the A391 Xtrema2 2.5. No matter what the quarry, there's an AL391 Urika shotgun ideal for pursuing it.

3901

Similar to the rebirth and strengthening of the American hearts and minds following recent events in our country...so too is the rebirth of our newest family of auto-loading shotguns. With a reliability reputation forged in the battles of clay target competitions around the world, Beretta introduces a new workhorse to take afield into the game coverts and flyways of America – the 3901 shotgun.

The award-winning and competition proven A390 shotgun introduced in 1996, is the launch pad for the 3901 shotgun family. MADE IN AMERICA, the model 3901 shotgun features the softest shooting gas system around, a high strength steel alloy hammer forged barrel, Mobilchoke versatility, and a removable trigger group locked in place by a single pin.

The 3901 Citizen is a true no-nonsense tool that you'll feel comfortable throwing behind the seat of your pick-up, but is an old friend you can rely on when the shooting heats up.

The 3901 Statesman features the rugged reliability of the 3901 family with a simple understated elegance and a simple uncomplicated adornment.

The 3901 Ambassador sports the rich warmth and climate shielding protection of our X-tra wood stock and fore end. Further refinements include a high polished receiver with a tasteful engraving scheme, Gel-Tek recoil pad, and optionally included TRUGLO fiber optic front sight.

Nothing is more important than seeing that our young people learn to use guns safely and responsibly. Which is why we've teamed with The NRA Foundation to form Partners for the Future and to bring you a series of unique, limited edition Beretta Shotguns. These are some of the most special shotguns Beretta has offered because a portion of the proceeds from each purchase

PARTNERS FOR THE FUTURE

will help fund the Beretta Youth Endowment, a permanent resource for youth education and youth hunting and shooting sports. We think you'll agree that owning an NRA Partner shotgun is not only an extraordinary opportunity for you, but also for future generations of young shooters.

471 SILVER HAWK

Beretta leads the world in over-under shotguns, but a certain breed of hunter demands the special handling of a classic side-by-side game gun. For that shooter, Beretta presents the 471 Silver Hawk. Combining half a millennium's worth of design skill and craftsmanship with the latest in materials and finishes, it is a hunting arm that is both beautiful and rugged.

The frame is made of a steel alloy rich in nickel, chromium and molybdenum for beauty and durability. Extensive scroll and leaf engraving and a gold-inlaid hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company.

The 12-gauge Optima-Choke tubes improve on-target performance by subjecting the shot charge to a smooth, gradual constriction as it passes through the tube.

The 20-gauge gun has conventional barrels with Mobilchoke tubes. Regardless of gauge, barrels are joined to the monobloc by a sophisticated laser system that creates the strong, secure Beretta Block. If you demand the fast handling of a classic game gun, try the 471 Silver Hawk.

PIGEON SERIES — EELL DIAMOND PIGEON & EELL DIAMOND PIGEON COMBO

This is an over-under with the feel and allure of a classic game gun. Extensive floral engraving on the frame sets off the game scenes engraved on the sideplates. Choose a Diamond Pigeon in any of the standard gauges from 3" 12-gauge down to .410 bore.

The EELL Diamond Pigeon is also available in 20/28-gauge and 28-gauge/.410 bore combinations. When you combine fine engraving and highly figured oil-finished walnut, you make a classic statement of your good taste.

PIGEON SERIES — EL GOLD PIGEON II & EL GOLD PIGEON II COMBO

Striking figured walnut and distinctive engraving make the EL Gold Pigeon II a luxurious hunting arm that will satisfy your need for a personalized field shotgun. It comes in two frame sizes: 12/20-gauge and 28-gauge/.410 bore. The 12-gauge version and the smaller bores each

have their own decorative sideplate patterns: pheasants and quail for the 12-gauge, partridge and woodcock for the small bores. Select any of the gauges, or go for a combination: 20/28-gauge or 28/.410. This is a gun that will be the companion of a lifetime!

PIGEON SERIES — SILVER PIGEON V

There's a new heart of the Silver Pigeon line — the Silver Pigeon V. Admiring fellow shooters will immediately notice the unique Beretta Color-Case frame. Beretta's exclusive process gives steel the classic look of color-casehardening, but with modern durability. When combined with extra-fancy oil-finished walnut and gold game inlays, the Silver Pigeon V will get noticed in any hunting field.

Choose a 12-gauge, inlaid with pheasants and mallards, or a 20- or 28-gauge version, decorated with quail and grouse. The 28-gauge has a properly-scaled frame for perfect proportions, weight and handling. All versions are provided with a TruGlo Tru-Bead front sight that will draw your eye to the target in every lighting condition.

PIGEON SERIES — SILVER PIGEON V

For maximum security in the hunting field, the safety is automatic, with the barrel selector conveniently inset into the safety button. This prestigious hunting arm will last generations, thanks to Beretta's dual-cone locking system, which compensates for years of wear. Your Silver Pigeon V

will be well-protected in a high-impact molded carrying case, which has compartments for choke tubes and other accessories.

When you're ready for the finest in a hunting shotgun, you're ready for the Silver Pigeon V.

SILVER PIGEON V
J6871R6

BERETTA COLOR-CASE FINISH MAKES THE SILVER PIGEON V THE MOST DISTINCTIVE MEMBER OF THE PIGEON SERIES. IT HAS THE LOOK OF COLOR-CASEHARDENING, BUT WILL LAST THROUGH DECADES OF HEAVY USE.

Weight	6.8 lbs (12-gauge)
Carry Case	Yes

PIGEON SERIES — SILVER PIGEON IV

Beretta shotguns are carried with pride on every continent. Once in a while, though, Beretta offers a gun strictly for the American hunter, and the Silver Pigeon IV is the latest example. In contrast to most Beretta over-unders, it has a rich black frame, accented by gold inlays that reflect the typical

quarry for each gauge. The 12-gauge features duck and pheasant, while quail and grouse take flight on the 20- and 28-gauge models. A hand-filled beavertail fore-end caters to traditional American tastes. It's a striking gun that stands out—even among other Berettas.

SILVER PIGEON IV
J6871A6

THE RICH BLACK FRAME IS ACCENTED BY GOLD INLAYS OF GAME BIRDS IN FLIGHT.

PIGEON SERIES — SILVER PIGEON III

If you're looking for a gun that's a bit more distinctive than the Silver Pigeon S or Silver Pigeon II, while staying in the moderate price range, try the new Silver Pigeon III. It has all the features of the S and II, but with more extensive floral and scroll decoration and hunting scenes on the frame.

The 12-gauge features ducks in flight and flushing pheasants, while the smaller bores feature quail and woodcock engraving.

SILVER PIGEON III
J6871G8

HIGHLY EMBELLISHED FLORAL AND SCROLL ENGRAVING ADORNS THE BOTTOM OF THE SILVER PIGEON III'S RECEIVER AND TRIGGER GUARD.

LIKE A BEAUTIFUL PAINTING ON CANVAS, THE SILVER PIGEON III'S SIDEPLATES ARE EXQUISITELY ENGRAVED WITH GAME SCENES OF DUCKS IN FLIGHT ON THE 12-GAUGE, AND QUAIL AND WOODCOCK ON 20- AND 28-GAUGE.

PIGEON SERIES — SILVER PIGEON II & SILVER PIGEON II COMBO

With the Silver Pigeon II, we tastefully introduce a few of the custom features found in our premium products. The receiver features a deep-relief etching of hunting scenes – a texture that is as beautiful to the eye as it is real to the touch. The oil-finished stock is of select walnut with a traditional Schnabel fore-end; the buttstock has an oval inlay on which the owner's initials can be engraved.

As with all our field guns, the Silver Pigeon II is designed to perform. The 680-series low-profile receiver with conical locking lugs ensures that the bore-axis remains as close as possible to the shooter's hand. This accounts for the legendary pointability of our shotguns, which is known in shooting circles as the "Beretta feel." Furthermore, the unique locking system provides for years and years of trouble-free usage thanks to its absolute strength.

SILVER PIGEON II
J687105

BOLD GAME SCENE ENGRAVING SEPARATES THE SILVER PIGEON II FROM OTHER SHOTGUNS.

GAME SCENES WITH FLORAL BORDERS MAKE THE SILVER PIGEON II STAND OUT IN ANY COMPANY.

PIGEON SERIES — SILVER PIGEON II & SILVER PIGEON II COMBO

Tipping the scales at 6.8 lbs, the 12-gauge Silver Pigeon II is a delight to carry around the field, regardless of how long and intense your hunt. On the shoulder, it is extremely gentle thanks to its impeccable ergonomics and soft recoil pad. The automatic safety with barrel selector ensures not only the necessary safety, but also your capability to choose which choke and barrel to use when a shot is needed.

The Silver Pigeon II is available in a variety of gauges, configurations and barrel lengths (see specification table). It comes equipped with high-impact molded carry cases, five choke tubes and wrench, sling swivel, spare recoil pad and a flask of Beretta Oil.

PIGEON SERIES — SILVER PIGEON S & SILVER PIGEON S COMBO

The Silver Pigeon S marks the dividing line between Beretta's more economical double guns and the highly decorated luxury models. While popularly priced, it offers the aesthetics and materials of the premium over-unders. The frame has extensive, but refined, floral and scroll decoration that will make this shotgun a source of pride for years to come.

It has the same dual-cone locking mechanism that lets Beretta over-unders stand up to years of constant shooting and to be passed on from generation to generation. Placing the locks between the barrels allows a low frame profile that gives Beretta over-unders an unmatched lively feel and natural pointability.

SILVER PIGEON S
J686S10

ATTRACTIVE SCROLL AND FLORAL DECORATION DISTINGUISH THE SILVER PIGEON S.

THE TRIM PROPORTIONS OF THE BERETTA FRAME MAKE THIS GUN A CLASSIC.

THE SILVER PIGEON S HAS THE DECORATION ONE MIGHT EXPECT IN A MORE COSTLY SHOTGUN.

PIGEON SERIES — SILVER PIGEON S & SILVER PIGEON S COMBO

As befits a field gun that will be used in exciting hunting situations, the safety is automatic, resetting each time the Silver Pigeon is opened for reloading. Select the top or bottom barrel to fire first by sliding a catch inside the safety button. A set of five Mobilchoke tubes comes with the gun: full, improved modified, modified, improved cylinder and cylinder bore.

Your Silver Pigeon S will travel in style and security in a lockable molded plastic case that has recesses for choke tubes, choke tube wrench, Beretta Oil and other accessories.

It has integral handles on the side and end to make handling easy, whether you're loading it in the car for a local dove hunt or driving to South Dakota for a week of pheasant hunting.

Select 12-gauge or 20-gauge models, both with 3" chambers, or the fast handling 28-gauge with a 2¾" chamber. The 26" barrel is ideal for hunting species like grouse or woodcock that stick to heavy cover, while the 28" barrel is the classic all-around length. Combo offers a 20-gauge with 26" and 28-gauge with 28" barrels.

ONYX SERIES — ONYX PRO & ONYX PRO 3.5

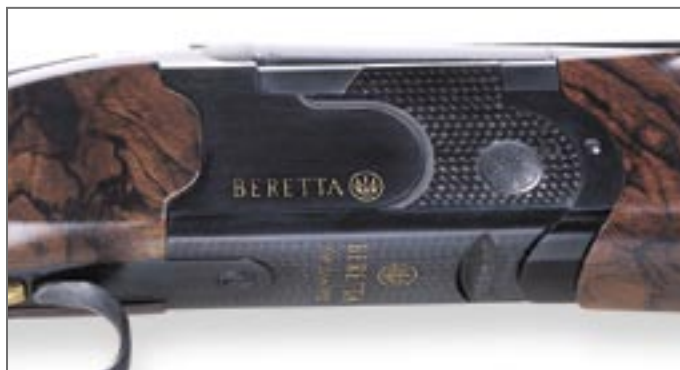

Many hunters would like to use an over-under in the field, but fear damaging fine woods and metal finishes. That's no excuse with the Onyx Pro Series. These guns are every bit as rugged as they are beautiful: they can take the harshest environment all day and still gleam in the gun rack when you've cleaned them.

The key is Beretta's exclusive X-tra Wood, an all-over synthetic waterproof film that covers the stock wood, both protecting it and providing dramatic grain figure. The butt stock is fitted with a recoil-killing Gel-Tek Pad, while the fore-end is a comfortably husky beavertail.

DIAMOND-PROFILE CUT CHECKERING

ONYX PRO
J6862A6

X-TRA WOOD AND A LUSTROUS FRAME FINISH MAKE THE ONYX A STRIKING EXAMPLE OF THE GUNMAKER'S ART. AS WITH THE WHITE ONYX, THE ONYX PRO OFFERS DURA-JEWEL ENHANCEMENTS.

BERETTA'S PROVEN COMBINATION OF TANG SAFETY AND BARREL SELECTOR PUTS YOU FULLY IN CONTROL.

ONYX SERIES — ONYX PRO & ONYX PRO 3.5

The Onyx Pro frame is blued, with Beretta's Dura-Jewel machining accenting subtle markings and a gold trigger.

The barrels are fitted with extended Mobilchoke tubes for fast switches when hunting conditions change. Five tubes are supplied with each Onyx Pro shotgun: full, improved modified, modified, improved cylinder and cylinder. Onyx Pro—take it anywhere!

Beretta will replace or refinish, at its sole discretion, any X-Tra Wood stock and/or fore-end that has been damaged superficially by the original owner of the shotgun. The program will not cover modified stocks or fore-ends. All specialized stock hardware (recoil pads, cheekpieces, adjustable combs, Morgan pad systems, etc.) will be returned to the owner. Beretta will install only factory original stocks and fore-ends.

The charge for this service is:

\$199.00 for Teknys and 3901

\$249.00 for the Onyx Pro

Includes fitting charges to over & under shotguns.

The refurbishment program is valid for a period of three years from the date of purchase only if the owner returns the Beretta "I+2" Warranty card to Beretta USA (or registers online at www.berettausa.com).

After this three-year period, or if the owner does not enroll in the "I+2" Warranty, Beretta USA will charge standard parts & labor charges in effect at the time of the refurbishment request.

This program does not replace or invalidate any portion of Beretta USA's existing warranty policy.

The customer is responsible for the delivery of the shotgun to Beretta USA. Beretta USA will pay for the shipping costs associated in returning the shotgun to the customer. This program may be canceled at any time, without prior notice, by Beretta USA and is valid only in the United States.

If you have any questions about this program, please contact Beretta USA's Customer Service Department at 1-800-BERETTA. Wood Refurbishment Program.

ONYX SERIES — WHITE ONYX

Onyx is one of Beretta's most versatile shotgun lines, and includes something for every style of hunting. The White Onyx has a satin nickel frame, accented with Beretta's Dura-Jewel machining. It features a gloss-finished select walnut stock with a Schnabel fore-end and classic two-point diamond cut checkering.

WHITE ONYX
J6862K6

THE NATURAL METAL FRAME OFFERS THE DISTINCTIVE DURA-JEWEL DESIGN FOR A UNIQUELY CLASSIC LOOK.

BERETTA OVER-UNDERS ARE KNOWN FOR THEIR SLIM, LOW PROFILE RECEIVERS THAT LET THE SHOTGUN REST LOW IN THE HANDS FOR BETTER POINTABILITY.

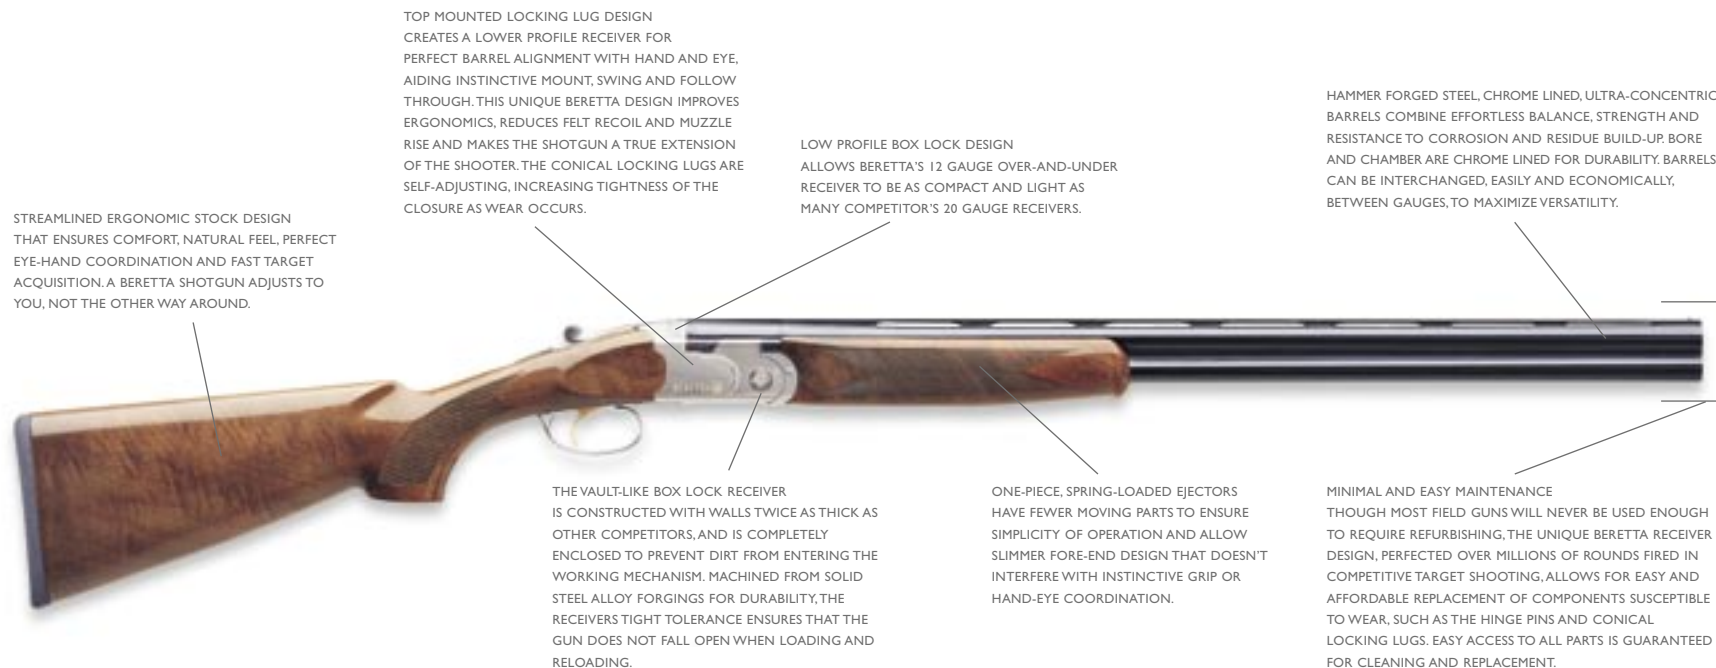

THE ACTION IS CLOSELY INLETED INTO THE WALNUT STOCK FOR BEAUTY AND DURABILITY.

ULTRALIGHT SERIES — ULTRALIGHT & ULTRALIGHT DELUXE

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. If you're the sort of hunter who stays on the trail until dark, day after day, you need the Beretta Ultralight. At just 5.75 pounds, the Ultralight is a 12-gauge that carries like a smallbore. The key to the Ultralight's feathery feel is a light but strong aluminum frame, reinforced at the breech face

and shoulders with hard, durable titanium. These lightweight alloys, combined with a standard-diameter Mobilchoke tube barrel, keep weight to the very minimum while preserving the smooth, sure handling you expect from a Beretta.

ULTRALIGHT
J687559

A STANDARD-DIAMETER MOBILCHOKE BARREL HELPS KEEP WEIGHT TO JUST 5.75 POUNDS.

A LIGHT BUT STURDY ALUMINUM FRAME, REINFORCED WITH TITANIUM GIVES THE ULTRALIGHT ITS FEATHERY FEEL.

THE ULTRALIGHT IS A 12-GAUGE THAT CARRIES LIKE A SMALLBORE.

- MOLDED CASE INCLUDES:
- 5 CHOKE TUBES
 - CHOKE TUBE WRENCH
 - SLING SWIVELS
 - BERETTA OIL
 - BUTT PLATE OR RECOIL PAD

Ultralight Deluxe	J687575	12	28"	MCF	\$2,495

*See page 44 for choke tube information.

ULTRALIGHT SERIES — ULTRALIGHT & ULTRALIGHT DELUXE

The Ultralight has a semigloss-finished walnut stock with a Schnabel fore-end. Its receiver is tastefully decorated with the sort of game birds a hunter might pursue with Ultralight in hand—quail and woodcock.

For the hunter who wants an even more distinctive shotgun, the Ultralight Deluxe adds highly figured oil-finished walnut and gold inlays on either side and the bottom of the frame, complimented by full floral engraving. With the Ultralight Deluxe, you'll take on the hardest cover in high style!

ULTRALIGHT DELUXE
J687575

THE ULTRALIGHT DELUXE OFFERS AN OIL-FINISHED WALNUT STOCK AND GOLD INLAYS ON THE FRAME SIDES AND BOTTOM.

WHY LOW PROFILE? BERETTA'S BOX LOCK MECHANISM ALLOWS A LOWER PROFILE RECEIVER. THIS BENEFITS THE SHOOTER'S ACCURACY ALLOWING THE HAND AND EYE TO BE MORE CLOSELY ALIGNED.

KING RANCH SHOTGUNS

BERETTA TRADITION MEETS AMERICAN LEGEND Beretta is extremely proud to announce our partnership with the legendary King Ranch of Texas. Founded by Captain Richard King in 1853, King Ranch is acknowledged as the birthplace of America's ranching industry –

A trade that sparked a new way of life and contributed to the timeless romance of the Old West. Among the many historic feats accomplished on the ranch's vast 825,000 acres is the breeding of the first registered American Quarter Horse.

**SILVER PIGEON S****BELL DIAMOND PIGEON**

KING RANCH SHOTGUNS

Today, King Ranch is a natural home for the Beretta experience. Sportsmen and women from all around the world regard it as a coveted destination for hunting, bird-watching and other outdoor-style adventures. Its great expanse is an unspoiled habitat for a variety of local and exotic game, and its history and tradition are a constant source of awe for all who visit. Inspired by this classic American legend, we are creating a series of limited-edition guns for the discerning hunter and

collector. This line will be launched in the course of 2005, and will include King-Ranch-themed interpretations of our most popular sporting guns.

Please visit www.beretta.com or your Beretta dealer for prices, specifications and availability!

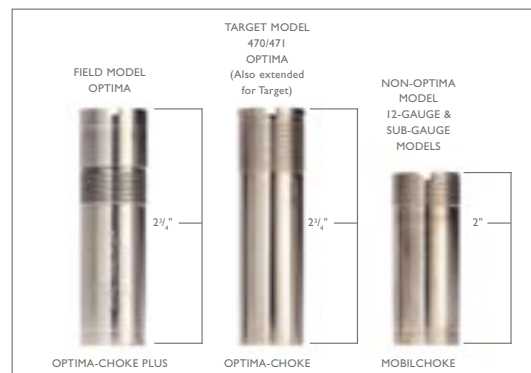

SILVER PIGEON IV

AL391 TEKNYS

A black plastic carrying case is open, revealing three stainless steel probes stored in individual slots. Two additional probes are shown lying outside the case to the right. The probes have a cylindrical body with a threaded section and a hexagonal base.

COMPETITION SHOTGUNS

Olympic gold medals. There's no more reliable gauge of gunmaking excellence. From the 1956 to the 2004 Games, Beretta shooters stood on the top podium eleven times, and brought home nine silver and eleven bronze medals. Since 1978, world-class shotgunners have used Berettas to bring home a total of 147 world championship medals in trap, double trap and skeet. The record is the same in home-grown disciplines like American trap and skeet and NSCA sporting clays. Even if your competitive goals don't extend past winning the Calcutta on league night, you'll benefit from the constant improvements made in Beretta's competition shotguns. Improvements like Optima-Bore® barrels, Optima-Choke® tubes, adjustable cheekpieces and removable trigger groups. Maintaining dominance is even harder than gaining it. Beretta is committed to staying on top, and keeping you there, too.

UGB25 XCEL

The Beretta semiautomatic UGB25 Xcel features an innovative locking system with break-open action that allows operation in complete safety during competitions. Unlike conventional fixed-barrel semiautomatic shotguns, the second round is not hidden from view inside the magazine tube, but is

DOUBLE RECOIL DAMPER FOR BOLT PARTS

THE TWO-TECHNO POLYMER RECOIL DAMPERS OF THE BREECH BOLT CUSHION ITS IMPACT ON THE REAR OF THE RECEIVER, REDUCING VIBRATION AND INCREASING THE LIFE OF THE GUN.

REDUCED FELT RECOIL

FELT RECOIL IS MINIMIZED BY THE SHORT BARREL RECOIL OPERATION SYSTEM: BY THE LOW BARREL AXIS POSITION WHICH TRANSMITS THE RECOIL FORCES DIRECTLY IN LINE WITH THE SHOOTER'S SHOULDER; BY THE DOUBLE RECOIL DAMPERS LOCATED IN THE RECEIVER; BY THE BERETTA RECOIL REDUCTION SYSTEM IN THE STOCK AND BY THE RECOIL ABSORBING BERETTA GEL TEK RECOIL PAD.

STOCK

MADE OF SELECTED WALNUT WITH A WATER-RESISTANT OIL-FINISH, THE STANDARD (MONTE CARLO COMB) STOCK COMES WITH A BERETTA GEL-TEK RECOIL ABSORBING PAD THAT REDUCES MUCH OF THE FELT RECOIL DURING FIRING. DIFFERENT SIZE RECOIL PADS CAN BE MOUNTED IN A FEW SECONDS TO MODIFY THE LENGTH OF PULL. THE STOCK IS DESIGNED TO HOLD THE BERETTA RECOIL REDUCTION SYSTEM. THE FORE-END, WHICH IS ALSO MADE OF WALNUT, HAS A SEMI-BEAVERTAIL CONFIGURATION. THE EXCLUSIVE, NEWLY DESIGNED CHECKERING ON THE STOCK AND FORE-END, MADE BY LASER TECHNOLOGY, ENHANCES THE LOOK OF THE SHOTGUN AND GUARANTEES A FIRM HOLD EVEN IN THE MOST ADVERSE WEATHER CONDITIONS. BETWEEN THE STOCK AND THE RECEIVER IS A FIBERGLASS-REINFORCED TECHNO POLYMER SPACER AND INSIDE THE STOCK IS A METAL PLATE THAT CAN BE USED TO CHANGE THE DROP AND CAST OF THE STOCK BY SIMPLY MODIFYING THEIR ASSEMBLY POSITION. A SET OF ADDITIONAL SPACERS IS ALSO PROVIDED.

RECEIVER

THE BERETTA BREAK-OPEN SEMIAUTOMATIC UGB25 XCEL FEATURES THE UNMISTAKABLE TOUCH OF GIUGIARO DESIGN. THE ERGONOMICALLY ROUNDED BACK OF THE LIGHT ALLOY RECEIVER FITS SMOOTHLY INTO THE STOCK, ALLOWING QUICK AND INSTINCTIVE TARGET ACQUISITION. THE POLISHED SIDES CONTRAST PLEASINGLY WITH THE OTHER MATTE ANTI-GLARE SURFACES. THE STREAMLINED RECEIVER AND THE NEWLY DESIGNED FORE-END WITH ITS EXTENDED CHECKERED CONFIGURATION COMBINE TO GIVE THE BERETTA UGB25 XCEL AN EXTREMELY ATTRACTIVE LOOK. THE CROSS LOCKING BOLT OF THE BREAK-OPEN BARREL IS LOCATED AT THE TOP NEAR THE BACK OF THE RECEIVER. ON THE LEFT IS THE OPENING LEVER, AND ON THE RIGHT, THE CARTRIDGE CARRIER AND THE SECOND CARTRIDGE FEEDING PORT. THE EJECTION PORT IS LOCATED UNDERNEATH THE RECEIVER.

SIDE FEED, BOTTOM EJECTION

THE CARTRIDGE CARRIER RECEIVES THE SECOND CARTRIDGE ON THE RIGHT-HAND SIDE OF THE RECEIVER, MAKING IT IMMEDIATELY READY FOR USE. IT IS CHAMBERED AUTOMATICALLY THROUGH THE FEEDING PORT AFTER THE FIRST ROUND IN THE CHAMBER HAS BEEN FIRED AND EJECTED.

THE DESIGN OF THE CARTRIDGE CARRIER BUTTON AND ITS POSITION ON THE RECEIVER ENSURE QUICK AND EASY REMOVAL OF THE CARTRIDGE ON THE CARRIER. THE EJECTION PORT IS IN THE BOTTOM OF THE RECEIVER. THE EJECTOR EXPELS THE SPENT HULL DOWNWARDS, AWAY FROM THE SHOOTER AND NEARBY COMPETITORS; MEANWHILE IT IS USER-FRIENDLY FOR BOTH RIGHT AND LEFT-HANDED SHOOTERS.

UGB25

UGB25 XCEL

SHORT BARREL RECOIL

THE OPERATING PRINCIPLE OF THE BERETTA BREAK-OPEN SEMIAUTOMATIC UGB25 XCEL IS BASED ON SHORT RECOIL, WHICH KEEPS THE INTERNAL PARTS OF THE GUN CLEAN EVEN AFTER PROLONGED USE. THE SHORT RECOIL AND THE LOW BARREL AXIS POSITION ALMOST COMPLETELY COMPENSATE FOR MUZZLE JUMP DURING FIRING, WITH QUICKER AND EASIER RE-ALIGNMENT OF THE BARREL ON THE TARGET FOR THE NEXT SHOT. USE OF ALL 12 GAUGE 2¾" CARTRIDGES, FROM SUBSONIC ONES UP TO 1½ OZ. CARTRIDGES CYCLE THE GUN EFFICIENTLY.

HAND POSITION INDICATOR ON THE FORE-END

IN FRONT OF THE EJECTION PORT, IS A POLYMER INSERT USED TO INDICATE THE CORRECT POSITION OF THE HAND ON THE FORE-END DURING FIRING TO PREVENT CONTACT WITH THE HULLS AS THE SPENT CARTRIDGES ARE EJECTED.

Xcel

	UGB25 XCEL
Gauge	12
Cartridge chamber	2¾"
Operation	Semiautomatic, with break-open action, short recoil
Locking system	Rising locking block
Receiver	Light alloy with dual elastomer bolt recoil absorbers
Barrel	Three-alloy steel, fully chromed inside, Optima-Bore® profile
Rib	Ventilated, interchangeable
Front sight	Competition type
Safety	Button-operated, on trigger guard; reversible for left-handed shooter
Stock, fore-end	Walnut, Laser checkered. Adjustable drop. Right or left cast.
Length of pull	14.09" - 14.72" with medium Gel Tek recoil pad
Weight (approx.)*	7.7 - 9.0 Lbs.

* The values may vary with the density of the wood, the length of the barrel and the shotgun's configuration according to the application.

UGB25 XCEL

MULTI-ADJUSTABLE STOCK

IN SOME VERSIONS THE WALNUT STOCK IS FULLY ADJUSTABLE IN TERMS OF DROP AND CAST AND IS SUPPLIED WITH THE BERETTA MEMORY SYSTEM. THE LENGTH OF PULL CAN BE VARIED BY ADJUSTING THE RECOIL PAD SUPPORT AND THE CAST AT HEEL AND AT TOE CAN BE MODIFIED BY CHANGING THE ANGLE OF THE BERETTA GEL•TEK INTERCHANGEABLE RECOIL PAD. THE MULTI-ADJUSTABLE STOCK COMES WITH THE BERETTA RECOIL REDUCTION SYSTEM INSIDE, COMPRISED OF A SPRING MASS SYSTEM, WHICH COUNTERACTS THE BACKWARD FORCE OF THE GUN DURING FIRING, SIGNIFICANTLY REDUCING FELT RECOIL.

TRIGGER PLATE

THE TRIGGER PLATE IS MADE ENTIRELY OF HIGH-RESISTANCE FIBREGLASS-REINFORCED TECHNO POLYMER AND FEATURES SELF-LUBRICATION OF THE FIRING MECHANISM. ADDITIONALLY, THIS TRIGGER PLATE MATERIAL HAS EXCELLENT VIBRATION ABSORPTION AND THERMAL STABILITY FOR IMPROVED "FEEL" IN COLD WEATHER. IT IS DESIGNED SPECIFICALLY TO OPTIMIZE THE ERGONOMICS. THE SAFETY BUTTON IS IN THE STANDARD POSITION (FOR RIGHT-HANDED USE) BUT A COMPETENT GUNSMITH MAY REVERSE IT FOR LEFT-HANDED USE.

UGB25 XCEL

OPTIMA-BORE® BARREL, OPTIMACHOKE® TUBES

ALL VERSIONS OF THE BERETTA BREAK-OPEN SEMIAUTOMATIC UGB25 XCEL COME WITH AN OPTIMA-BORE® BARREL WITH A LENGTHENED FORCING CONE FOR ENHANCED PATTERN DISTRIBUTION SENSITIVITY, REDUCED FELT RECOIL AND SHOT VELOCITY OPTIMIZATION. THE INTERNAL SHAPE OF THE BERETTA'S OPTIMACHOKE® AND EXTENDED OPTIMACHOKE® TUBES IS DESIGNED TO REDUCE SHOT DEFORMATION AND TO ENHANCE SHOT PATTERN DISTRIBUTION AND CONCENTRATION. THEY MAY BE USED WITH STEEL SHOT CARTRIDGES. THE ALUMINIUM ALLOY TOP RIB IS EASY TO REMOVE AND IS INTERCHANGEABLE WITH OTHERS OF DIFFERENT TYPES AND SIZES.

FULL KIT OF ACCESSORIES

THE BERETTA BREAK-OPEN SEMIAUTOMATIC UGB25 XCEL COMES IN A CASE THAT CONTAINS A WIDE RANGE OF ACCESSORIES: A SET OF DROP/CAST SPACERS, A 25-ML BOTTLE OF BERETTA GUN OIL, A MULTI-PURPOSE SERVICE TOOL, INTERCHANGEABLE OPTIMACHOKE® OR EXTENDED OPTIMACHOKE® TUBES AND CHOKE TUBE WRENCH.

AL391 TEKNYS GOLD

The AL391 Teknys Gold is Beretta's ultimate field autoloader. With an added suite of standard and optional features, it becomes the AL391 Teknys Gold, the ultimate autoloader for the sporting clays course or trap field. You'll pick it out instantly; the receiver is distinctively engraved with a stylized Beretta logo on the left side, and both sides feature blue enameled inserts that unite the receiver and buttstock in a stylistic look and distinguish the Target model from the green-enameled field gun.

Fitted in the buttstock of every Teknys Gold Sporting or Trap shotgun is an 8.5-ounce recoil reducer based on the Spring-Mass system pioneered in the 3½-inch 12-gauge Xtrema. If reduced

weight is required by the shooter, the system is easily removed without the need of a gunsmith. Those who want to keep a forward balance can help counteract its weight with an optional 3.7-ounce steel magazine tube. The self-compensating gas operating system regulates ammunition of varying ballistics, and has been thoroughly proven in the successful AL391 Urika series. The Teknys Gold Sporting and Trap models add a fast bolt release feature for fatigue-free shooting when shoot-offs last all afternoon.

AL391 TEKNYS GOLD

The overbored 12-gauge Optima-Bore barrel has a long forcing cone for reduced recoil and pellet deformation. Optima-Choke tubes are a full 2¾" inches long to prove a smooth-patterning gradual constriction. The 20-gauge model uses extended Victory Mobilchoke tubes. The barrel is topped by an interchangeable rib system that allows the shooter the flexibility of customizing their rib requirements. NOTE: Optional ribs are under development. Please visit the Beretta website for future availability. All are fitted with TruGlo Tru-Bead fiber optic luminous front sights that give a bright sight picture against any background.

The select walnut buttstock can be fitted with a rubber recoil pad or with the recoil-smothering Gel-Tek silicone-core recoil pad. A supplied set of spacers allows the shooter to adjust, drop and cast to accommodate different body types and shooting styles. The redesigned checkering pattern has been developed to combine maximized comfort while preserving the stylish appearance. A gun this distinguished deserves great care, and the Teknys Gold Sporting is presented in a fitted polypropylene case that has additional storage compartments for all the supplied tools and accessories.

AL391 URIKA

Add specialized competition features to the thoroughly developed AL391 Urika field gun and you have target arms that are reliable, soft shooting and beautifully designed. All the Urika 12-gauge competition guns are now fitted with Beretta's Optima-Bore barrels that soften recoil and produce more even patterns for top target-busting performance. Optima-Choke™ tubes are a full

2¾" long to constrict the pattern smoothly and gradually for minimum pellet deformation. Ventilated ribs are fitted with white front and metal mid-beads. Whatever your target discipline, there's an AL391 Urika to help you win!

DT10 TRIDENT

Outside of our Premium Guns, this is the top of the Beretta line; a shotgun that's at home at any level of competition, from league night at your home club to the Olympics. There are models for the sporting clays fan, skeet devotee or trapshooter. All feature an ergonomic top lever. The trigger assembly can be removed from the frame without tools for cleaning or maintenance.

You'll never have to worry about a broken spring or clogged mechanism. If you're not satisfied with anything less than the ultimate in competition arms, examine the Beretta DT10 Trident. No requirements are too demanding for this masterpiece.

DT10 TRIDENT

Each DT10 model is designed discipline specific. You'll never have to worry about a broken spring or clogged mechanism. Skeet and trap versions feature an adjustable comb that allows you to regulate your personal sight picture. Beretta's patented "Memory System" feature lets you remove and replace the comb without losing your individual settings.

682 GOLD E

Whatever the target discipline, there's a 682 Gold E to help you dominate. Whether you shoot skeet, sporting clays, American or bunker trap, you'll find a version to fill the bill. All feature Beretta's Optima-Bore™ barrel system with long forcing cone and overbored internal bore diameter. Optima-Choke™ tubes give you clay-smoking patterns, thanks to a gradual constriction that reduces pellet deformation.

The 682E is designed to be shot hard. The conical locking lugs are designed to compensate for the wear of thousands of rounds and barrel shoulders are replaceable if you're the type who buys ammo by the pallet. The 682E is beautiful, too, with a distinctive receiver engraving and inlay pattern that immediately identifies it as a target gun. The trigger is adjustable for pull length, and the 682E comes with two trigger shoes. The safety is manual; you won't have to worry whether it's applied an instant after calling for a target.

687 EELL DIAMOND PIGEON & EL GOLD PIGEON II SPORTING

The 687 EELL 12-gauge features ventilated side ribs to keep barrels cool in the longest shoot-off. Buttstock and fore-end are made of highly figured select walnut; the sporting gun has a Schnabel fore-end. The 20/28-gauge and .410 bore features a solid mid rib to maintain weight and balance. The sporting model is available in 20- and 28-gauge and .410 bore.

To protect your investment while traveling to tournaments, the 687 EELL Diamond Pigeon models are presented in a sturdy ABS plastic case with plenty of room for the supplied choke tubes, wrench, Beretta Oil and other accessories. When you arrive with a 687 EELL Diamond Pigeon, they'll know you've come for one reason, to win!

687 SILVER PIGEON II & III SPORTING

At the core of the 687 Silver Pigeon III Sporting is our legendary 687-series receiver. This low-profile, positive-locking, low-maintenance action ensures that your off-hand stays as close as possible to the bore-axis; in this manner, whatever you point to is exactly where the shot goes.

The receiver is embellished with a scroll and game scene designed by our most experienced Master Engravers in Gardone, Italy. The way this pattern is executed on the receiver makes it virtually as striking as if it had been hand-engraved, but without the price-tag to match.

687 SILVER PIGEON II SPORTING

686 WHITE ONYX SPORTING

The White Onyx Sporting offers the sporting clays competitor an elegant yet affordable target shotgun with a European flair. It will stand out on any course with its low-profile Dura-Jewel frame with attractive and durable nickel-alloy finish. The contrasting flat and jeweled surfaces of the frame and the gold trigger stand out against the subtle matte oil-finished walnut buttstock

and Schnabel fore-end. The safety is manual, preventing inadvertent engagement that can cost targets. A tapered rib will ensure quick pointing on all sorts of targets. Whether you're a seasoned competitor or just taking up the game, the White Onyx Sporting will meet your requirements.

NATIONAL PROOF HOUSE YEAR STAMP MARKINGS

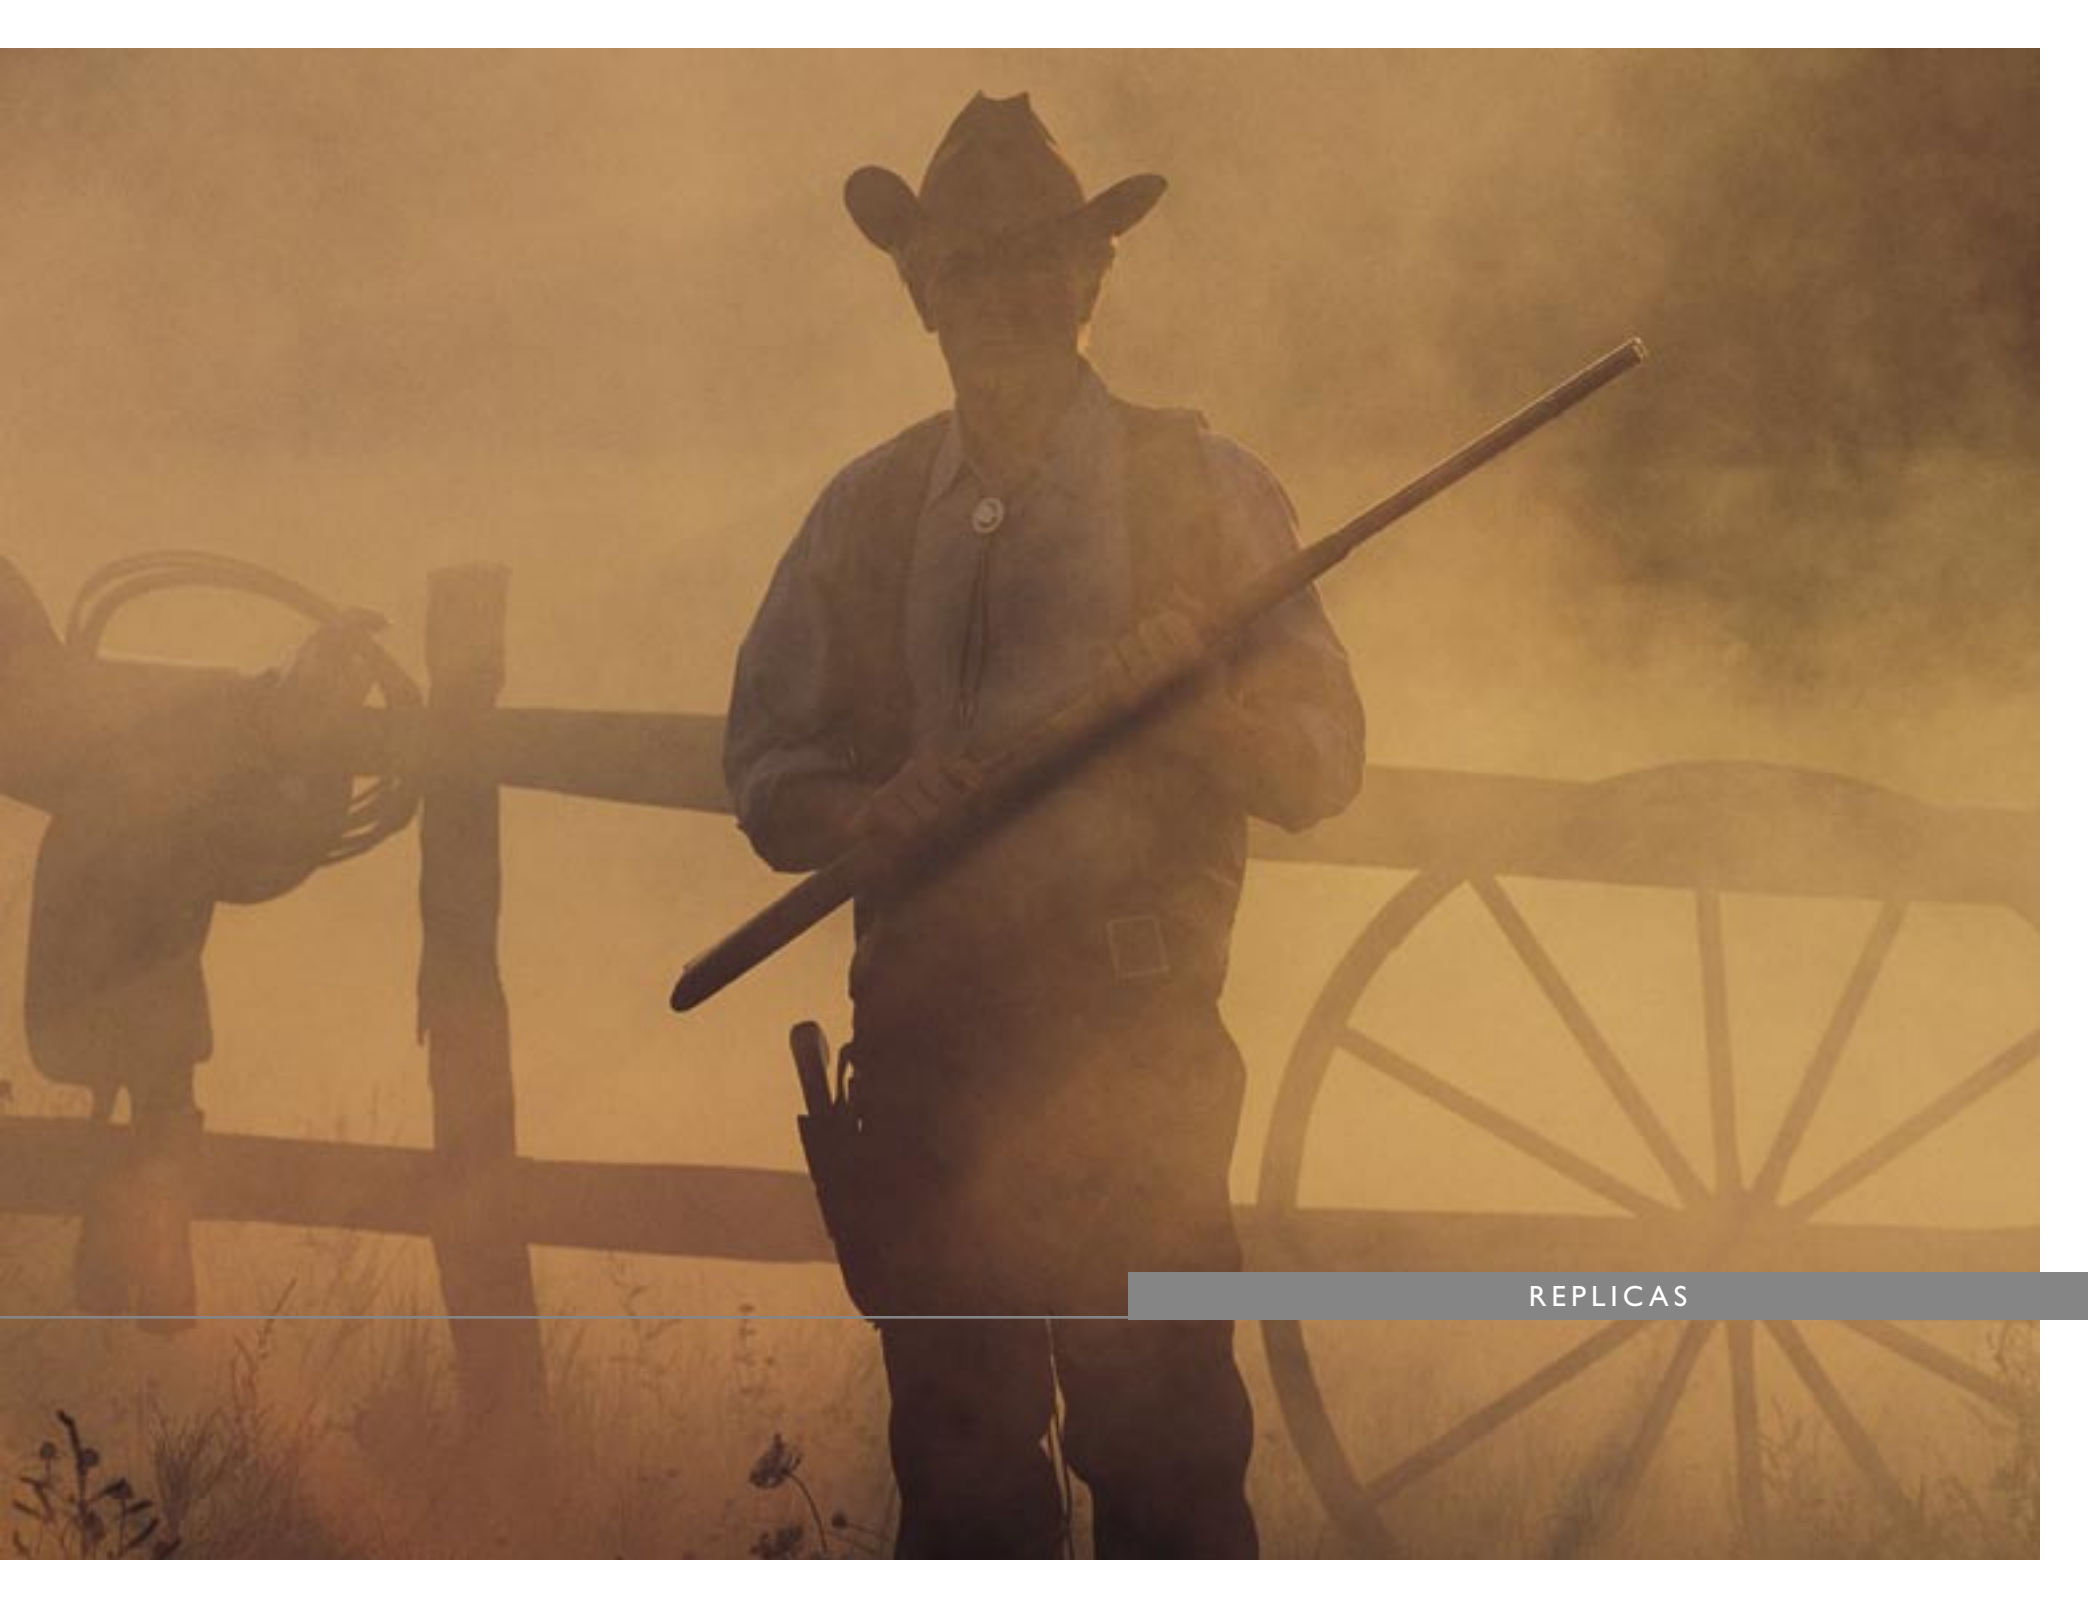

The "Banco Nazionale di Prova" (National Proof House) stamps all Italian manufactured firearms after proofing. The year stamp noted designates the year of proof. In the case of new firearms

the proof year corresponds to the year of manufacture (Italian manufactured firearms only). The markings are most commonly found on the receiver/frame and on the barrel.

YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK

REPLICAS

STAMPEDE

There's no gun more quintessentially American than the single-action revolver. So some might ask, what do Italians know about cowboy revolvers? The answer is easy: the craftsmen of Italy's "Gun Valley" created the modern replica arms industry in the 1950s, and that skill is reflected in the Beretta Stampede. It combines the feel and handling qualities of the original "hogleg" with a

transfer-bar safety system that makes it safe to carry with all six chambers loaded. Whether you're a hardcore cowboy competitor or just a weekend plinker who feels the lure of the Old West, the Stampede is your gun!

STAMPEDE

There's a Stampede for every holster! The Stampede Inox, combines lustrous stainless steel with traditional black synthetic grips for an eye-catching contrast. The standard version combines a blued barrel and black polymer grip with a frame finished in Beretta Color-Case, which duplicates the classic look of color-casehardening.

The Deluxe model adds select walnut grips and a lustrous charcoal-blued barrel and cylinder. Or if you like to stand out a bit more at the range, select full polished nickel plating with walnut grips. Choose the original cavalry barrel length of 7½" or the more handy 5½" or 4¾" barrels. Choose the traditional .45 Colt or powerful .357 Mag.

PISTOLS & HOME PROTECTION

When howling sandstorms raged during Operation Iraqi Freedom, America's troops counted on their Beretta M9 pistols when danger threatened. More than 450 years of gunmaking tradition, combined with the best of today's materials and engineering, meant they carried sidearms built to stand up to every hazard. Whether you're selecting a pistol for service or sport, Beretta autoloaders and revolvers are guns you can trust!

U22 NEOS

Neos means "new" in Greek, and Beretta's American design staff started with a clean sheet when drawing up this new line of .22 pistols. The lines are meant to appeal to a new generation of shooting enthusiasts who are respectful of the past while bringing a fresh attitude to the shooting sports. The Neos pistols feature cutting-edge design, modular

construction that allows personalization and the flexibility for many shooting disciplines. Available at popular prices, the Neos is ideal for new shooters, but it won't easily be outgrown as skills improve.

U22 neos

U22 NEOS 6.0 INOX
JU2S60X

U22 NEOS 6.0
JU2S60B

THE NEOS IS EASILY DISASSEMBLED FOR CLEANING AND MAINTENANCE WITHOUT SPECIAL TOOLS. JUST REMOVE THE MAGAZINE FROM THE GRIP, BARREL FROM FRAME AND GRIP FROM FRAME. THIS IS SIMPLICITY BY DESIGN!

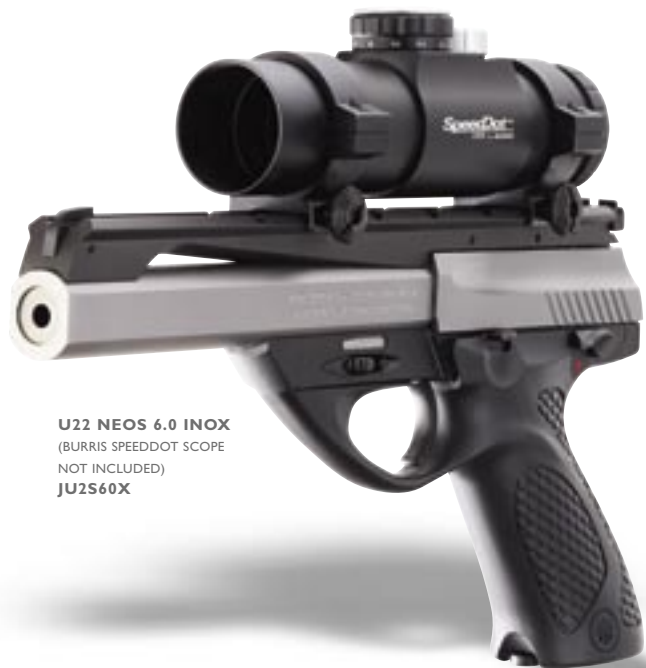

Style Conscious Shooters Have
Made the NEOS One of the
Fastest-selling .22 Autoloaders Ever!

U22 Neos 7.5 Inox DLX	JUDS75X	Single	Target/Polymer w/Inlays	22LR	\$395

U22 NEOS

The advanced shooter demands more control, and gets it in the Neos DLX. The best in off-hand accuracy comes from a trigger adjustable for takeup and overtravel. Front sight posts in black, red and white match rear sight leaves outlined in the same colors. Blue or gray (for the Inox

version) soft rubber grip inserts. An aggressive grip molding pattern makes the grasp secure when match pressure gives even the seasoned competitor moist palms. Select the standard 6" barrel or specify the extra sight radius of the 7½" barrel.

U22 NEOS

The modular design and parts interchangeability of the Neos make it the top value in its class, with category-leading features at an affordable price. Grip frames in a variety of colors and interchangeable rubber inserts make it easy for the user to personalize the Neos from mild to wild. All three barrel lengths (4½", 6" and 7½") are fitted with integral rails that accept all standard

Weaver-style rings for easy scope mounting. Changing barrels doesn't mean rezeroing, either: both front and rear sights are fixed to the integral rail and stay with the barrel. Neos is a pistol that can grow and change to fit your shooting interests, from plinking to small game hunting to competition.

U22 neos

U22 NEOS MODULAR SYSTEM BARRELS, SIGHTS, AND GRIP FRAMES EASILY INTERCHANGE TO PERSONALIZE YOUR PISTOL.

ACCESSORY BARREL ASSEMBLY

CHOOSE A BLUED OR INOX SLIDE.

U22 NEOS

For 2005, Beretta offers the Neos Carbine Kit*, a shoulder stock and barrel that turns the pistol into a handy, accurate long gun. Without special tools, you can return it to pistol configuration.*

*CARBINE KIT MAY NOT BE SOLD IN CALIFORNIA. WARNING: A RIFLE WITH A BARREL LESS THAN 16 INCHES IN LENGTH IS CLASSIFIED AS A "SHORT BARRELED RIFLE" AND MUST BE REGISTERED AS SUCH WITH THE BATF IN ACCORDANCE WITH THE NATIONAL FIREARMS ACT. CONSULT YOUR LOCAL BATF OFFICE FOR REGISTRATION INFORMATION (SOME STATES DO NOT ALLOW REGISTRATION OF SHORT BARRELED RIFLES; CONSULT YOUR LOCAL AUTHORITIES FOR MORE INFORMATION).

92/96

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS most resembles the military M9 9mm pistol, while the 96 offers the same features, but is chambered for the popular .40 S&W cartridge.

**22LR PRACTICE KIT
J9022PK**

BUILD YOUR SHOOTING SKILLS WITH THE OPTIONAL .22 CONVERSION KIT FOR THE 92/96 PISTOLS. IT'S EASILY INSTALLED AND REMOVED.

The "F"-series pistols of the 92/96 family have a safety system that combines decocking with a positive thumb safety. The Inox models feature stainless steel slide and barrel

construction, as well as rubber grips. Beretta's proprietary black Bruniton finish gives your 92/96 a wear-resistant coating which means these pistols will stand up to any special duty.

Developed to meet the “Special Duty” requirements of elite law enforcement and military units, this advanced pistol is also ideal for IDPA competition shooting. The “G” decock-only mechanism guarantees that the pistol is always ready to fire, eliminating the possibility that the safety is accidentally left engaged during stressful competitive shooting events. The “SD” features an integral accessory rail machined into the frame to attach a variety of popular white light and laser devices.

The Brigadier style recoil-reducing heavy slide, and removable front and rear Trijicon 3-dot tritium sights come standard. The frame is customized to include front and back strap checkering and an aggressively beveled magazine for faster reloading. The stainless barrel, finished in our proprietary Bruniton™ finish, boasts a machined target crown. The extended magazine button allows for quick magazine drops.

92/96

As the name implies, the Elite pistols are for advanced competition shooters who want to carry only the best when gunning for IDPA and IPSC championships. The "IA" model combines a slim vertical grip frame with the integral accessory rail of the Vertec and the Brigadier slide. Practical competitors will like the forward slide serrations, skeletonized hammer, beveled magazine well and

stainless barrel cut flush with the front of the slide. Like the "IA", the Elite II uses the "G"-style decocker lockwork, but with the traditional curved-butt Beretta frame. It adds a stainless steel slide with Novak rear and thin serrated front sight. Both guns feature beveled magazine wells and a flush hammer spring cap that deletes the lanyard loop of the service models.

9000S

There's no doubt you're looking at a work of art when you see the Beretta 9000S. Its styling, by legendary Italian design house Giugiaro, is one-of-a-kind. Soft wrap-around polymer grip insert makes it easy to grasp in the toughest conditions, and resistant to corrosion. It's available in both 9mm Parabellum and .40 S&W calibers, both with 10-round magazines.

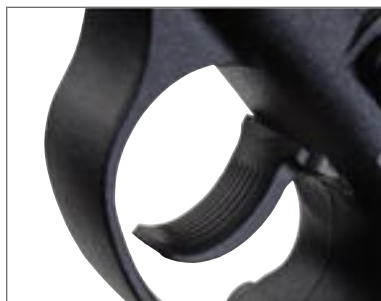

It will accept "pre-ban" 92/96 magazines for increased capacity (using optional adapter). An extendable magazine "bottom", that extends $11/32$ " when the pistol is drawn and retracts when it is holstered, is included. (See Pistol Pro Shop section for details.)

THE 9000S IS SIMPLE, ROBUST AND RELIABLE:
THE HALLMARKS OF A PISTOL YOU CAN COUNT ON.

THE POLYMER FRAME MAKES THE 9000S
BOTH COMFORTABLE TO SHOOT AND RESISTANT
TO CORROSION AND WEAR.

EXPERTS PREFER A DOUBLE-ACTION TRIGGER IN
A PISTOL DESIGNED FOR CONCEALED CARRY.

CHEETAH & 87 TARGET

If you prefer the light recoil and report of the .380 Auto cartridge, the Beretta Cheetah is for you. While the 84FS and 85FS offer conventional blowback operation.

The 87 Cheetah is a sporting version in .22 Long Rifle. All the Cheetahs are light, fast-handling pistols that are ideal for personal defense or police back-up carry. Beretta's proprietary black Bruniton finish provides a wear-resistant coating. Back by popular demand, the nickel finish models carry checkered, walnut grips.

BARREL

HIGH-STRENGTH NICKEL-CHROMIUM-MOLYBDENUM STEEL WITH HARD CHROMED BORE FOR LONGER LIFE.

OPEN SLIDE DESIGN

OPEN TOP SLIDE VIRTUALLY ELIMINATES JAMMING AND STOVEPIPING.

FIRING PIN BLOCK

SIGHTS

FAST, SURE TARGET ACQUISITION FROM STANDARD 3-DOT SYSTEM. NOTCHED REAR SIGHT IS DOVETAILED FOR WINDAGE ADJUSTMENT. BLADE FRONT SIGHT IS INTEGRAL WITH SLIDE.

COMBAT-STYLE TRIGGER GUARD

PROVIDES SUPPORT FOR A TWO HAND GRIP AND OFFERS AN ENLARGED OPENING FOR EASY ACCESS WITH GLOVES.

85FS CHEETAH J85F200

THE 85FS CHEETAH IS AN IDEAL DEFENSIVE PISTOL FOR THOSE WHO PREFER THE MILD RECOIL AND REPORT OF THE .380 AUTO CARTRIDGE.

AMBIDEXTROUS SAFETY

EASILY ACCESSIBLE BY THE THUMB FOR RIGHT OR LEFT HANDED SHOOTERS.

DOUBLE ACTION TRIGGER

THE FIRST ROUND IS FULL DOUBLE-ACTION MODE, AND THE SECOND AND ALL SUBSEQUENT ROUNDS ARE FIRED SINGLE-ACTION.

DURABLE FRAME

AN ANODIZED ALLOY OFFERS SUPERIOR CORROSION RESISTANCE. MATTE BLACK FINISH IS NON-REFLECTIVE.

CHEETAH & 87 TARGET

While the 87 Cheetah is a lightweight pistol for field carry, the 87 Target is a heavyweight competition gun that will be at home on any range. It features both adjustable metallic sights and a Weaver-style rail for mounting scopes or red dot sights. A squared-off muzzle allows a steady ready position on the bench for practical or international standard pistol shooting. The single-action trigger is light and crisp for accurate off-hand firing. You can add the optional walnut grips from our Pro Shop line of products.

BOBCAT & TOMCAT

When police officers or concealed carry permit holders look for the ultimate in concealability, they look to the Beretta Tomcat in .32 Auto and the Bobcat in .25 Auto and .22 Long Rifle. These double-action pistols may be tiny, but they're reliable defensive arms. Both pocket pistols are

available in blued or Beretta Inox (stainless) finishes. The tip-up barrels allow rounds to be loaded directly into the chamber without slide retraction. Tomcat and Bobcat: unobtrusive companions for the toughest streets.

Cx4 STORM

Beretta's Cx4 Storm redefines the pistol-caliber carbine, with racy and radical lines from the masters of industrial design at Giugiaro. Form follows function in a symphony of smooth, sweeping curves made possible by the use of modern high-strength technopolymers. Beretta's use of cutting-edge materials also keeps weight down to just 5¾ lbs., making the Cx4 a pleasure

to carry, whether in the field or on duty. Five different models accept full-size Beretta magazines from the 92/96 and Cougar series pistols in 9mm, .40 S&W and .45 Auto, including large-capacity restricted and pre-ban styles. The cold hammer-forged 16.6-inch barrel is chrome-lined for long life and corrosion resistance with any ammo.

WWW.BERETTA.COM

C*x*4 STORM

The C*x*4 is unsurpassed in its adaptability for right- or left-handed users. Ejection and operating handle can be switched from the standard right side to the left without the use of tools or spare parts. The crossbolt safety and magazine release are reversible for the left-hander, too. The firing pin and hammer are blocked until the trigger is pulled, and a bolt safety locks the bolt to prevent it

cycling should the C*x*4 be dropped on its butt. The magazine is protected inside the grip, helping keep it safe from damage in vigorous maneuvers. Sling studs and loops on both sides of the butt stock allow a variety of sling configurations for comfortable carrying.

SIDE AND BOTTOM ACCESSORY RAILS ALLOW EASY MOUNTING OF TACTICAL LIGHTS, LASERS AND OTHER ACCESSORIES, ONE SIDE RAIL INCLUDED. BOTTOM ACCESSORY RAIL AVAILABLE AS ACCESSORY.

Case	No

* Without stock spacers installed ** Adjustable with stock spacers

Cx4 STORM

Unlike folding-stock carbines, the Cx4 is comfortable to fire, with a rubber comb insert for a comfortable cheek rest. Adding spacers allows length of pull adjustment from 13 to 15 inches in .6 inch increments, letting the Cx4 fit users of all heights and making it easy to accommodate winter clothing, protective vests and other gear. Today's shooter demands a gun that can accept a

large assortment of accessories, and here the Cx4 caters for all tastes. A retractable accessory rail extends from the fore-end for mounting tactical lights. Rails can be installed on either side or the bottom of the fore-end for lasers or forward grips.

ADJUST PULL LENGTH TO YOUR SPECIFICATIONS WITH SUPPLIED SPACER. (TWO MORE SPACERS MAY BE ADDED AND REMOVED)

THE OPTIONAL PICATINNY (MIL-STD-1913) TOP RAIL ALLOWS EASY INSTALLATION OF DOT SIGHTS OR SCOPES.

THE OPTIONAL CARRYING CASE PROTECTS THE CX4 FROM THE ELEMENTS.

Cx4 STORM

Controls are very similar to those found on our popular 92FS pistol, so most shooters will be immediately familiar with the operation of this firearm. Length of pull can be lengthened in .6" increments, from 13" to 15" by addition one to three stock spacers (one provided). Multiple sling attachment points allow a multitude of carry options. A retractable forward accessory rail extends out from the fore-end, allowing quick mounting of a tactical light or laser unit.

Hard mounting points allow the addition of various accessories, including side, top and bottom "Picatinny" rails. These will accept optics, tactical lights, lasers and vertical grips. One side rail is included. The front post sight is adjustable for windage and elevation, while the rear sight has long-range and ghost ring apertures. Both sights are protected by rugged "ears" and may be folded down when optics are used..

Cx4Storm

Px4 STORM

INDIVIDUALIZED PERFORMANCE. The Px4 Storm is built around a modular concept so that a single pistol can be adapted to different needs. This without compromising on the legendary ergonomics, reliability and performance for which Beretta is rightfully known. Available in 9mm

and 40 S&W; this pistol features the F-type single-action/double-action firing mechanism with de-cocker and manual safety.

Px4 Storm

PX4 STORM
JXF9F11

FLUSH AND OPTIONAL LANYARD HAMMER SPRING CAPS, ALLOW FOR THE USE OF TACTICAL RETENTION LANYARD.

STANDARD SUPER-LUMINOVA SIGHTS GIVE HIGH TARGETING PERFORMANCE IN ALL TYPES OF LIGHT CONDITIONS. WITH MINIMAL EXPOSURE TO LIGHT (OR FLASHLIGHT), THIS LUMINOUS MATERIAL IS "CHARGED" AND VISIBLE IN LOW-LIGHT.

SAFETY/DECOCKER LEVER GEOMETRY PREVENTS ACCIDENTAL ENGAGEMENT OR DISENGAGEMENT WHEN RETRACTING SLIDE.

NEW Px4 STORM

The Px4 can be adapted to different levels of concealment or to different hand-sizes, concealment modes and shooting styles. The back-strap can be customized to three sizes; the safety lever and magazine-release button come in two additional sizes to accommodate a smaller or larger grip.

INTERCHANGEABLE GRIP BACKSTRAPS ALLOW FOR CUSTOMIZATION TO THE INDIVIDUAL'S HAND SIZE. MEDIUM COMES STANDARD ON THE GUN, WHILE SMALL AND LARGE ARE INCLUDED IN THE BOX FOR EASY MODIFICATION.

MULTIPLE-SIZED, REVERSIBLE MAGAZINE RELEASE BUTTONS ALLOW FOR CUSTOMIZATION TO THE INDIVIDUAL'S HAND SIZE. SMALL SIZE COMES STANDARD ON THE GUN, WHILE MEDIUM AND LARGE BUTTONS ARE INCLUDED IN THE BOX FOR EASILY REPLACEMENT. EACH SIZE CAN BE POSITIONED FOR RIGHT-HANDED OR LEFT-HANDED USE.

MIL-STD-1913 "PICATINNY" STANDARD ACCESSORY RAIL. ALLOWS MOUNTING OF OPTIONAL TACTICAL LIGHTS AND LASER UNITS.

Thanks to these options, the same powerful and reliable handgun can be adapted to fit diverse needs and uses.
