COMPANION - SILVER GYRFALCON

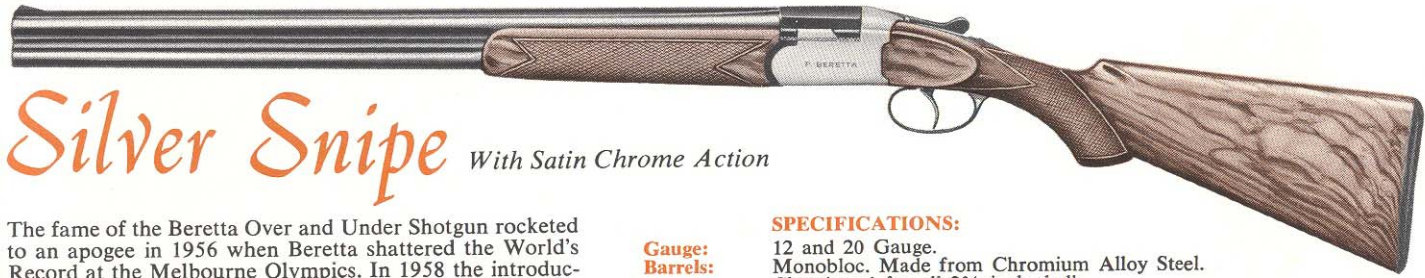

For three centuries Beretta has produced Quality Sporting Shotguns and Defense Weapons. Today, with plants on two continents, Beretta Sporting Shotguns are sold in over one hundred countries. The present Beretta organization with Small Arms Research Departments, Special Design Sections, and with unequalled Production Equipment, is headed by world famous metallurgical authority Dr. P. Beretta.

Lighter and Stronger — to satisfy the demands of discriminating modern hunters, Beretta instituted a research program to develop all steel sporting guns that would be both lighter and stronger. To accomplish this aim, the most modern steels employed in high speed aircraft and rocketry have been utilized. The result is that the Beretta shotguns presented here actually shoot further at higher velocities. In addition, they are so perfectly balanced that the finest controlled shooting ever known in the hunting field is now possible. We hope, as an experienced sportsman, you will choose one of these superb sporting shotguns as your hunting companion.

BERETTA OVER AND UNDER • SINGLE TRIGGER • FEATHERWEIGHT

Silver Snipe With Satin Chrome Action

The fame of the Beretta Over and Under Shotgun rocketed to an apogee in 1956 when Beretta shattered the World's Record at the Melbourne Olympics. In 1958 the introduction of the Silver Snipe brought the greatest advance in Over and Under designs in 100 years. Chromium alloy steel barrels are fitted to the exclusive Beretta Monobloc receiver drawn from a single block of steel together with the barrel lugs and the front of the rib. Greatest elasticity and strength are thus obtained. Single trigger functions on inertia principle after lower barrel is fired first.

Selection of Barrel Lengths—Chokes—Approx. Weights:

Silver Snipe

*With Vent Rib
and Satin Chrome Action*

One of the finest over and under shotguns in the world. Designed for precision production with specific tolerances throughout. Offers all the deluxe features of the Silver Snipe but with Ventilated Rib. Preferred for hard field, skeet and trap shooting. Generous proportion of the forearm keeps hands and fingers away from heated barrels. Recoil is kept at an absolute minimum.

Selection of Barrel Lengths—Chokes—Approx. Weights:

12 Ga. 30" Bbl. Full and Full Choke.....	7 lbs. 4 ozs.
12 Ga. 30" Bbl. Trap Choke	8 to 8½ lbs.

Golden Snipe

*With Vent Rib,
Automatic Ejectors and Satin Chrome Action*

In addition to the deluxe features of the Silver Snipe as already outlined, the Golden Snipe offers the added advantages of both the Ventilated Rib and Selective Automatic Ejectors. The Ventilated Rib prevents visual interference of heat waves rising along the sight line from overheated barrels and thus makes possible for perfect aiming. For speed reloading, the Selective Automatic Ejectors eliminate time consuming hand-rejection of spent shells.

Selection of Barrel Lengths—Chokes—Approx. Weights:

BERETTA PUMP SHOTGUN • HI-SPEED • FEATHERWEIGHT

Golden Pigeon

With Vent Rib and Satin Chrome Action

One of the DeLuxe Models of the Beretta Pump Shotgun is the Golden Pigeon. It is designed for the experienced gunner, and incorporates a Ventilated Rib to prevent sighting distortion due to heat waves caused by extended rapid fire. The carefully worked action is extra smoothed to a soft gliding motion that makes for effortless pumping. The stocks are top graded from selected Italian Walnut and hand finished with wood engraved checkering of the finest quality. Available also in Skeet and Trap Models.

Selection of Barrel Lengths—Chokes—Approx. Weights:

BERETTA DOUBLE BARREL MAGNUM • SINGLE OR DOUBLE TRIGGER

Engraved Satin Chrome Action

Silver Hawk MAGNUM

10, 12 and 20 Gauge Single Trigger or 10 and 12 Gauge Double Trigger Magnum Double Barrel Shotgun. Heavy duty. Exceptional balance. 12 and 20 gauge take 3" magnum and 10 gauge takes 3½" magnum shells. Barrels of extra special chromium steel are fitted to exclusive Beretta Monobloc receiver drawn from a single block of steel together with the barrel lugs and the front of the ribs. Greatest elasticity and strength are thus obtained. To prevent leading, erosion and rusting, the interior of the barrels are super polished. The durable firing mechanism is sealed off from moisture and dirt. Because of its weight, only the densest Italian walnut is used in the stock and full beavertail forearm.

Selection of Barrel Lengths—Chokes—Approx. Weights:

10 Ga. 32" Barrel—Full and Full Choke....Over 10 pounds
 12 Ga. 32" Barrel—Full and Full Choke... Over 8 pounds

BERETTA

The production facilities of the Beretta plant and factories are without peer in the world today. The finest tools and dies permit the gauging and maintenance of tolerances that can only be equalled but never surpassed. Machines and equipment from every corner of the earth are secured for the production of Beretta guns.

It may be of interest to know the raw materials used to produce Beretta guns are chosen from world markets in order to secure precisely the correct metallurgical quality for each part made. The complete testing laboratory guarantees that materials delivered are according to samples submitted and specifications laid down by the Beretta Materiel Division.
