

2007 - 2008
BERETTA
ANNUAL

 BERETTA

At the core of Beretta is a passion.
An understanding of the wild places. The cold fields of autumn.
The high grass and the low marsh. Rain and sun. Man and dog.

It's an understanding that is pure and real.
It lives in the deepest reaches of the hunter's heart.
The innermost corners of the shooter's soul.

And it is everywhere.
A field in Tuscany. A lake in Wyoming. The flash of a tail. The thunder of wings.

And then there is the stirring. The relentless search for balance.
Between what has gone before and what is yet to be.
Between then and now and tomorrow.

This is the passion that drives Beretta. It's in our genes.
And so, too, is it in our hearts. It's why we exist.
And it's why we have endured for nearly 500 years.
Because of one purpose. One passion.

BERETTA
A FAMILY TRADITION

La Presidenza
Fabbrica d'Armi Pietro Beretta S.p.A.
Via Pietro Beretta, 18
25063 Gardone Val Trompia
Brescia, Italy

Dear Friends,

It is with great pleasure that I welcome you to our newest edition of the Beretta Annual.

This book not only showcases the breadth and scope of Beretta products, but stands as a testament to the concepts that have made our brand what it is today. Beretta was built on a foundation of reliability, craftsmanship, and a drive for innovation. From those principles we have never wavered.

But our company has also been shaped by a set of beliefs that have guided and driven our decisions as we navigated the centuries. The first of these is integrity, perhaps the foremost reason we have succeeded over so many years. Responsibility goes hand in hand with integrity. Being a good steward and doing the right thing will take you a long way. Finally, we have a passion for all that we do. You see it in the details of our handiwork and in our commitment to our customers.

These are the cornerstones that built Beretta; they represent my family's passion and drive what we do every day. In the context of that historic background, in this Annual I am pleased to present a new way for our customers to look at Beretta.

What does this mean?

After nearly 500 years, we have not abandoned our passion. We are more committed to it than ever. Rather, the new categories under which you will find Beretta's products are a truer reflection of who we are. Beginning with my family, Beretta employees live, love, and believe in what we do. For us, it's much more than just a brand: it's a lifestyle. Just like you, the Beretta family's outdoor pursuits are wide ranging: upland, big game, waterfowl, competition shooting, Western and more. Because of this, we are committed to bringing you all-inclusive collections of firearms, apparel, and accessories—designed to complement each other and suit your passion, whatever it might be.

Cav. Ugo Gussalli Beretta
President, Fabbrica d'Armi Pietro Beretta S.p.A.

The beating of wings. The beating of your heart. The expectant and eager look in the eyes of your dog seemingly frozen in time. It is a scene you've both played out many times before. Yet it feels as fresh and exhilarating as the first time you swung your shotgun toward the skies. No matter the day's result, this moment is reward enough. Here, success is measured in the sheer joy of watching your dog work, in the beauty of cradling a finely crafted shotgun, and in finding the opportunities to test your mettle against nature.

These moments are what bring you back season after season. A respect for nature, harmony, and heritage are the hallmarks of the Beretta Upland sportsman. Hallmarks that are reflected in Beretta's superb collection of fine shotguns perfectly suited for their purpose in the field, superior upland apparel designed to meet the challenges of nature, and accessories that perfectly complement your passion and pursuit.

UPLAND

471 EL, SILVER HAWK

471 EL

Combining half a millennium's worth of design skill and craftsmanship with state-of-the-art technology, the classic side-by-side 471 EL is a hunting arm that is both beautiful and rugged. Its lines and finishes recall the best of a bygone era. The classic English-style buttstock and splinter fore-end are made of oil-finished select walnut. Case-hardened sideplates with Beretta's unique coloring process are decorated with eye-catching gold-filled game bird scenes.

471 SILVER HAWK

Extensive scroll and floral engraving and a gold-filled hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company. Just like the 471 EL, this side-by-side's receiver is made of a steel alloy rich in nickel, chromium and molybdenum for durability and beauty. Both shotguns feature barrels joined to the monoblock by a laser system that creates the strong, secure Beretta barrel assembly.

The 12-gauge Optimachoke® tubes feature longer tapered construction, assuring greater pellet concentration and better distribution of shot.

The sideplates are attached without visible screws, for a classic understated look.

687 EELL DIAMOND PIGEON

687 EELL DIAMOND PIGEON

In Italian, EL stands for extra lusso (extra luxury). The EELL designation takes that quality to an even higher level. This is an over-under with the feel and allure of a classic game gun for the discriminating sportsman who appreciates all the finer points of a well-made shotgun. The patented locking system creates a particularly slim receiver, making it one of the most elegant, finely balanced and responsive shotguns in the world. The extensive hand-chased engraving, combined with the highly figured oil-finished walnut, makes a classic statement of your good taste. The 687 EELL Diamond Pigeon is also available in 20/28 gauge Combo set.

The sideplate design gives the engraver full scope for his craft. When combined with fine walnut, nothing is quite so pleasing.

687 EL GOLD PIGEON II

687 EL GOLD PIGEON II

Striking figured walnut and distinctive engraving make the 687 EL Gold Pigeon II a luxurious hunting arm that will satisfy your need for a personalized field shotgun. The exceptionally strong, reliable, low-profile receiver is enhanced with deep relief engravings. The stocks and fore-ends are cut from superior quality walnut and built to withstand a lifetime of use and to guarantee a perfect balance and quick target acquisition. This is a gun that will be the companion of a lifetime. Also available in 20/28 gauge combo set.

"WE HAVE MANY BERETTA SEMI-AUTOMATIC SHOTGUNS THAT HAVE WELL IN EXCESS OF 300,000 ROUNDS OF AMMO FIRED THROUGH THEM. IN FACT, WE HAVE AN ONYX O/U SHOTGUN (SHOWN ABOVE) THAT HAS MORE THAN A HALF MILLION DOCUMENTED ROUNDS OF AMMO FIRED THROUGH IT...AND IS STILL GOING STRONG. IN OUR BUSINESS WE DON'T HAVE TIME TO MESS WITH PRODUCTS THAT DON'T PERFORM."

— Zeke Hayes, *Trek Safaris*, www.treksafaris.com

687 SILVER PIGEON

687 SILVER PIGEON V

The pinnacle of the Silver Pigeon line, this prestigious over-under is stocked in richly figured, oil-finished walnut and detailed with gold game bird inlays and a Beretta gold medallion underneath. The receiver is treated with Beretta's proprietary process that imparts a classic color-case finish that ensures metallurgical integrity and a distortion-free part. A joy to own and shoot, thanks to Beretta's superior mechanical refinement and innovative technology, the Silver Pigeon V will last for generations.

687 SILVER PIGEON IV

Beretta shotguns are carried with pride on every continent. The 687 Silver Pigeon IV is expressly styled to satisfy those who desire a classic blued finish. In contrast to most Beretta over-unders, it has a rich, classic black frame, accented by "gold" inlays that reflect the typical quarry for each gauge. It's a striking gun that stands out—even among other Berettas.

687 SILVER PIGEON III

There's no need to sacrifice style for function with this attractively priced member of the Silver Pigeon family. The distinctive 687 Silver Pigeon III has all the features of the S and II, but with more extensive engraving, including game scenes, on the frame. Available in a trim and racy 28 gauge made on its own properly scaled frame, this finely crafted shotgun with natural pointability is up to any hunting challenge.

UPLAND

687 SILVER PIGEON

687 SILVER PIGEON II

Designed to perform, the Silver Pigeon II is also as beautiful to the eye as it is to the touch. The oil-finished stock is select walnut with a traditional Schnabel fore-end; bold game scene engraving separates it from other shotguns. This over-under also enjoys the Beretta's legendary pointability, thanks to the 680 series low-profile receiver. Furthermore, the absolute strength of the unique locking system provides for years of trouble-free use. Also available in 20/28 gauge combo set.

687 SILVER PIGEON C

Add a bit more distinction to your shotgun with the 687 Silver Pigeon C. Developed to fulfill the needs of British shooters for an over-under with all the performance features of the Silver Pigeon line, but with an upgraded finish. This model sports a color case-hardened finish on the receiver and higher grade wood. In every other respect, the Silver Pigeon C offers all the design technology that makes Beretta over-unders the most responsive in the world.

686 SILVER PIGEON S

686 SILVER PIGEON S

With the same level of mechanical refinement as Beretta's higher end over-unders, this entry-level shotgun offers an economical way to enjoy both the aesthetics and quality of a prestigious Silver Pigeon. The extensive floral and scroll engravings are executed on a satin nickel-alloy finished receiver that is exceptionally resistant to wear and corrosion. And the dual-cone locking mechanism stands up to years of constant shooting.

686 ONYX PRO, WHITE ONYX

686 ONYX PRO

Every bit as rugged as it is beautiful, the Onyx Pro features Beretta's exclusive X-Tra Grain surface treatment that enhances the wood grain on the stock and fore-end. You'll also quickly appreciate the recoil reducing Gel-Tek pad that keeps your shoulders fresh through hundreds of rounds. A striking example of the gunmaker's art, this over-under features a blued frame with Beretta's Dura-Jewel machining accenting subtle markings and a gold trigger.

686 WHITE ONYX

At some point in every sportsman's hunting life - whether as a novice or a seasoned shooter in need of an additional gauge - a no-nonsense, versatile tool is called for. The 686 White Onyx, with its streamlined stock design for fast target acquisition, top mounted bolt-lug design for secure barrel lockup, and easy maintenance, fits the bill. The satin nickel frame is accented with Beretta's Dura-Jewel finish for a classic look.

ULTRALIGHT DELUXE

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. The Ultralight is a 12 gauge that carries like a small bore. The key to the Ultralight's feathery feel is a light but strong aluminum frame, reinforced at the breech face and shoulders with hard, durable titanium. In this Deluxe version, Beretta has added highly figured oil-finished walnut stock and full floral engraving with gold-filled game birds.

ULTRALIGHT

Like the Ultralight Deluxe, this sturdy over-under will help you stay afield. The lightweight aluminum and titanium alloys keep weight to the very minimum while preserving the smooth, sure handling you expect from a Beretta. The Ultralight has a semigloss-finished walnut stock with a Schnabel fore-end. Its receiver is distinctively decorated with the very game birds a hunter might pursue with Ultralight in hand.

Why low profile? Beretta's box lock mechanism allows a lower profile receiver. This benefits the shooter's accuracy, providing improved hand-to-eye coordination for instinctive shooting.

AL391 STONECOAT

AL391 STONECOAT GOLD

The AL391 Stonecoat Gold brings unmatched design and prestige to the most discriminating autoloader aficionado. Receiver, breech bolt, bolt handle, carrier, fore-end flange and trigger boast the unique Stonecoat multi-layered treatment of nickel, chrome, titanium-zirconium. A deep engraving and green enamel inserts give the Stonecoat gold its distinctive look. This distinctive sporting arm with superb recoil control performs as well as it looks. Its semiautomatic gas system cycles ammunition ranging from feathery target loads to thumping 12-gauge, 3-inch magnums.

AL391 STONECOAT

With a special multi-layered finish of nickel and chrome and a final protective layer of titanium and zirconium applied to the receiver and the proven self-compensating Beretta gas system, the AL391 Stonecoat defines both style and substance. The graceful lines of the silvery receiver blend seamlessly into the curves of the stock. Even with its luxurious look, you won't be afraid to take this Stonecoat out in the harshest elements thanks to Beretta's weather-resistant X-Tra Grain stock and receiver.

Stonecoat multi-layered finish.

AL391 GREYSTONE, URIKA PREMIUM, URIKA

AL391 GREYSTONE

The AL391 Greystone features a reduced 18,2 mm barrel bore diameter and a 70 mm cartridge chamber for improved shot pattern concentration, increased penetration and optimized muzzle velocity. The Greystone is a true expression of Beretta's skill in designing and in refining the mechanics with the versatile gas operation system of the Stonecoat models. The exclusive Greystone finish guarantees an overall higher resistance to wear and corrosion and superior longevity, enhancing the aesthetic of this model. Selected checkered walnut woods and richly jeweled bolt and carrier complete the look of the Greystone.

AL391 URIKA PREMIUM

The careful selection and wise combination of the finishes confer to the AL391 Urika Premium a completely new look. The luxurious aspect of the receiver is high-lighted by the contrast between the satin finish of its back and its meticulously hand-polished sides. The shiny black color of the receiver, bolt release button, fore-end gas flange and cap, perfectly complements the deep black of the barrel blueing and conveys to them a smooth look, pleasant to the touch.

AL391 URIKA

The workhorse of the Beretta autoloading line, the AL391 Urika's self-compensating gas system allows it to digest everything from the lightest target loads to the heaviest 2-ounce magnums. It's the answer to any hunting challenge. Reliability is the hallmark of this smooth-shooting, long-lasting auto shotgun. The 12 gauge is also available with Beretta's Optima-Bore® barrel and Optimachoke® tubes to cut recoil and improve patterns.

URIKA2 CLASSIC

AL391 URIKA2 CLASSIC

For Upland hunters, the Urika2 Classic comes in a standard model that features the new X-Tra Grain wood enhancement treatment — and for the first time on the base Urika — tasteful fine-line scroll engraving on either side panels of receiver.

THE BERETTA GAS SYSTEM IS TWICE AS FAST AS ANY OTHER OPERATING SYSTEM.

The gas system has been improved by the addition of a spinning and self-cleaning action. As gas pressure is fed into the gas cylinder, a series of expandable fingers on the piston move outwardly to clean the gas cylinder as the action cycles. Additionally, the gas piston is imparted with a spinning motion and "scraper teeth" to ensure carbon deposits are thoroughly dislodged and removed from the gas system. This improved cleaning action greatly contributes to enhanced reliability and longer functioning shooting periods between cleaning.

BURRIS SIGNATURE SELECT SEMI-COMPACT 8 X 32 MM - 10 X 32 MM

At only 10.8 cm long and 450 gr, these new Signature Select Semi Compacts are barely larger than pocket compact binoculars, but with premium components end-to-end and 32 mm objective lenses, the low light performance is excellent yielding high resolution and color-correct images.

X-TRA GRAIN

Also new is Beretta's proprietary X-Tra Grain wood treatment on standard models. This wood surface enhancement process, applied to the walnut of the stock and fore-end is obtained from a new technology that highlights the color contrast of the wood, resulting in a beautiful and rich pattern.

UPLAND

ES 100 WHITE

In addition to its reliable soft shooting gas systems, Beretta offers other unparalleled alternatives. The rugged, mechanically operated ES 100 boasts a vertical wedged locking lug that ensures a perfect lock-up. The ES 100 semiautomatics can handle anything from 2¾" (70 mm) loads to the heaviest 3" (76 mm) magnums. The new ES 100 White features an elegant nickel silver finish of the receiver and a superior quality of walnut stock and fore-end.

ES 100

The key to superior performance in semiautomatic shotguns is simplicity. Take down is easy for transportation, cleaning or storage. The ES 100 lightweight streamlined design affords instinctive handling, responsiveness and pointability. The checkered stock and fore-end made of straight grain walnut wood and sling swivels are provided. The Beretta ES 100 features the fully interchangeable Mobilchoke® tube system, while all visible metal parts have an opaque black, anti glare finish. From upland to wild turkey there's a Beretta ES 100 that's suitable for every use.

SIZE S - XXL

GUN6
GUN6 3660 COL. 75 SIZE S - XVI

Beretta's most exclusive hunting jacket is made of the brand new Huntex® fabric, a blend of cotton and Cordura®, durable, noiseless and soft to the touch. The heat-formed Gore-tex® liner and the CoolMax® lining ensure the utmost comfort, even in extreme weather conditions. The waterproof, breathable jacket keeps an even body temperature. This range also includes trousers, waistcoats, gloves and hats. These high-tech products and easy-to-wear garments are a must for hunting enthusiasts.

20 GOOD REASONS FOR CHOOSING GUN6

- Alcantara® collar lining and trim
- Removable neck protection
- Two-way heavy duty zipper closure with outside and inside wind protection flanges
- Ergonomic shoulders and sleeves
- Emergency waterproof hood
- Fleece-lined hand-warmer pouches
- Roomy game pocket with zip and stain-proof lining
- Velcro flap tabs
- Velcro flap closure scooped entry pocket for easy hand access
- Roomy bellows pockets
- Elasticized shell loops
- Adjustable storm cuffs
- Napoleon security pocket
- Internal mesh pockets with Velcro retainer
- Adjustable drawstring for added protection from the wind and rain
- Mobile phone pocket
- Document pocket with zipped closure
- Detachable mesh pockets for recoil pads
- Ventilation grommets
- Detachable shoulder straps

GUN6 FIELD PANT
CU03 3660 COL. 75 SIZE 46 - 62

Cordura® pants lined in Gore-Tex® are waterproof, durable and quiet.

UPLAND

APPAREL AND ACCESSORIES

A RESPECT FOR NATURE MEANS BEING PREPARED TO DEAL WITH THE ELEMENTS. THERE'S NO BETTER WAY THAN HAVING THE RIGHT GEAR FOR WHATEVER NATURE THROWS YOUR WAY.

CO22 2 99

Hunting knife with stag horn handle, 2 blades: solid and hook blades.

BIS JACKET

GU1M 2882 COL. 99 - 75

SIZE XXS - XXXL

The Beretta Interactive System begins with the need to develop layered clothing theme to help in different climatic conditions. Warm and lightweight, it's less than 400g, breathable, packable in the inside pocket, and it can be worn inside all the BIS (Beretta Interactive System) jackets.

KVJ

GU1G 3676 COL. 79 SIZE S - XXXL

Kevlar®, Cordura® and cotton jacket with Beretta BWB liner, Coolmax® personalized lining, weld seams and YKK zip. BIS (Beretta Interactive System) jacket or vest for more warmth and protection from extreme conditions.

KVP

**CU1G 3676 COL. 79

APPAREL AND ACCESSORIES

VINTAGE YEARS

FOR 500 YEARS BERETTA HAS PURSUED ONE PASSION: THE LOVE OF NATURE AND OUTDOOR LIFE.

A BLEND OF CREATIVENESS AND TRADITION, MODERNITY AND HISTORY, THIS PASSION IS REPRESENTED IN VINTAGE YEARS.

THIS HISTORICAL CLOTHING WAS DEVELOPED WITH CLASSIC FABRICS AND INNOVATIVE TREATMENTS THAT HEarken BACK TO THE YEARS WHEN MASTRO BARTOLOMEO BERETTA WAS STARTING HIS WORK IN THE GUNSMITH WORLD. IT RESOUNDS WITH THE NOISE AND COLORS OF TUSCAN FIELDS.

TUSCANY VEST

GU3R 1815 COL. 75 - 83 SIZE 46 - 62

100% double twist cotton vest with ten multifunctional pockets and easy cleaning zipped game bag.

TIBURZI JACKET

GU91 4400
COL. 20 - 22 - 72 - 83 - 88
SIZE 46 - 62

In the late 19th century in the Maremma, Domenico Tiburzi fought against injustice and the tyrannical acts of those who did not abide by the rules. He helped the needy by handing over to them the booty from his highway robberies. This 100% cotton Moleskin jacket takes inspiration from the one worn by the famous brigand. The result is a soft, elegant coat, ideal for the in-between season.

CORBARA JACKET
GU8C 4600
COL. 72 - 80 - 88 - 38
SIZE 46 - 62

Waterproof tweed cap with BWB liner.

WINTER COTTON CARGO PANTS

CU78 1817 COL. 75

SIZE 46 - 62 BWP LINER

CU78 1816 COL. 75 - 82 SIZE 46 - 62

An innovative fabric made with highly resistant cotton twill, winter cotton is perfect for outdoor use. These pants are available with and without the Beretta BWP liner, which guarantees protection against the wind.

Up before dawn on a cold and damp November morning. Coffee is brewing, your gear is carefully packed, and your retriever is waiting anxiously to do what he was born to do. As you head for the waiting shore, it seems a moment for which you, too, were born. Crouched in a blind with your dog quivering against your leg. The thunder of wings above. The hope of the day ahead. Then that one heart-stopping, defining moment: the shot, the splash, the retrieve.

These are the slices of time that stir the soul, that define the Waterfowler's passion for the pursuit of the wild places. It is a passion backed by the confidence that your Beretta shotgun and gear are absolutely up to this specific challenge—no matter what the elements throw at you. That's a confidence, backed by 500 years of tradition and technological innovation, you can count on with every pull of the trigger or zip of the jacket.

WATERFOWL

XTREMA2

KICK-OFF

Optional Kick-Off hydraulic dampening reduction system reduces recoil dramatically.

SYNTHETIC

AP CAMO

MAX-4 HD CAMO

Whether you are hunting the marshes or the wide open fields, there's a finish to handle the situation. The synthetic stock in black, Max-4® HD Camo or Hardwoods® HD Camo stands up to the elements.

UNTREATED

AQUA

TREATED

Using accelerated salt spray testing, the unprotected steel barrel section (top) shows corrosive effects while the Aqua-technology protected barrel (bottom) looks brand new.

XTREMA2
MOLDED CASE

Fitted, lined polypropylene case keeps the many supplied accessories in place. Includes 5 choke tubes, choke tube wrench, sling swivels, Beretta oil and butt plate or recoil pad.

“SOFT SHOOTING, HEAVY DUTY, RELIABLE, AND AMAZINGLY EASY TO CLEAN. THE XTREMA2 REPRESENTS QUITE POSSIBLY THE FINAL WORD IN 3¹/₂-INCH SEMI AUTOS.”

—Phil Bourjaily, *Field & Stream Magazine*

WATERFOWL

WHEN WE DESIGNED A GUN FOR THE MOST EXTREME ENVIRONMENTS,
WE WERE SURE TO WIN SOME EXTREME AWARDS.

Xtrema2

A391 XTREMA2

In 2002, Beretta introduced the original Xtrema. This gun quickly garnered *Field & Stream's* "Best Gun of the Year Award," *Guns & Ammo's* "Editor's Awards for Gun of the Year," and *American Rifleman's* "Golden Bulleye Award." In the relentless pursuit of excellence, our engineers have once again set the benchmark for a "do-it-all" shotgun in the form of the new Xtrema2 — *Shooting Illustrated's* "Shotgun of the Year."

This superb autoloading shotgun was designed and built to reliably function 2³/₄-inch (70 mm), 1-ounce equivalent loads through brutal 3¹/₂-inch (89 mm) magnum loads — interchangeably if you so desire. The Xtrema2 has more recoil reduction features than any other autoloading shotgun on the planet!

STRESS CONCENTRATION IMAGING

This shows the behavior of the Gel-Tek pad during the shooting cycle. Note the homogenous distribution of stress over the entire surface.

WHY BERETTA GAS OPERATED

Beretta's unique self-compensating semiautomatic gas operation system is considered the best in the world. The soft shooting gas system's recoil reduction automatically vents the excess gases of even the most powerful cartridges.

RECOIL REDUCTION

Beretta's new Kick-Off hydraulic dampening reduction system reduces recoil an astounding 44% more than its closest rival by using two hydraulic recoil dampers incorporated into the stock "spacer" unit. The recoil energy is gradually dissipated by the hydraulic dampers, resulting in superior comfort for the shooter.

XTREMA2

Xtrema2

A391 XTREMA2 SYNTHETIC

Designed from the outset to work hard for you, the Xtrema2 Synthetic incorporates Aqua technology for extreme protection against the elements. The improved trigger group provides for an extremely crisp, light pull and short travel for quick follow-up shots. This "do-it-all" shotgun features soft shooting gas operation, an integrated spring-mass recoil reducer, Optima-Bore® overbored barrel and Kick-Off recoil reduction.

A391 XTREMA2 CAMO AP®

The new All Purpose A391 Xtrema2 semiautomatic boasts a refined camo pattern designed to let it camouflage in nearly every setting. This superb autoloading shotgun keeps all the superior features of the synthetic model among which the extraordinary recoil reduction capability and the superior pattern efficiency of the Optima-Bore® and Optimachoke® Plus tubes.

QUICK DETACHABLE SLING SWIVEL

Thanks to an exclusive quick-release system it is possible to fasten and remove the rear swivel from the stock without any tool.

BURRIS FULLFIELD II CAMO BINOCULARS

See, but don't be seen. These new premium binoculars compress full-size performance about as compact as can be.

AL391 URIKA2 CAMO AP®

Dressed in camo that disappears in nearly every setting, the AL391 Urika2 All Purpose® is a foil for the gobbler's keen eyesight. This reliable autoloader is a real workhorse, too. Beretta's self-compensating gas system allows for smooth shooting in a wide range of loads, while the Optima-Bore® system reduces recoil and improves pattern performance by easing the shot charge's passage from cylinder to bore. The Kick-Off® hydraulic dampening reduction system is available on request.

AL391 URIKA2 CAMO MAX-4®

A smooth shooting, long-lasting auto shotgun, the AL391 Urika MAX-4® HD features the most effective and up-to-date camo pattern on the market — no matter which flyway you shoot on. Beretta's well-proven, self-compensating gas system provides just the right pressure for a wide range of loads, while the Optima-Bore® overbored barrel cuts recoil and improves your patterns. Kick-Off® on request.

AL391 URIKA2 SYNTHETIC

For the waterfowler who enjoys his shotgun in basic black and prefers the durability and versatility of a synthetic stock, this sleek autoloading shotgun is the answer. The hammer-forged barrel is chrome lined for corrosion resistance and easy cleaning, while Beretta's self-compensating gas valve lets you shoot the full range of your favorite ammunition. Kick-Off® on request.

KICK-OFF

RECOIL REDUCTION

Beretta's new Kick-Off hydraulic dampening reduction system reduces felt recoil by using two hydraulic recoil dampers incorporated into the stock "spacer" unit. The recoil energy is gradually dissipated by the hydraulic dampers, resulting in superior comfort for the shooter.

You've waited a lifetime, or so it seems, for this very instant. You've tracked this desired prize, this trophy, not just for hours or days, but since the very first time you brought the smooth finish of the comb to rest against your cheek. Since the very first day, you took to the mountains or the plains to test yourself against the world's most sought-after game. With the prize finally in your sights, you squeeze and put your faith in the hands of your—and the gunmaker's—experience and expertise.

For the Big Game hunter, the thrill of the hunt is paramount. Everything about it, from spectacular wilderness hunting fields to the perfect fit and feel of a superbly crafted rifle to the cut and durability of field-proven clothing, feels right. No one understands that better than Beretta. Our Big Game collection—apparel, accessories and our offering of superb Finnish Sako and Tikka rifles—has been tested time and again by professional guides and hunters to ensure your pursuit is undertaken with only the very best of everything at hand.

BIG GAME

SAKO 85 HUNTER

sako

Home to an impressive number of top Olympic shooters, Finland is also home to some of the world's finest rifles. For over eighty years, Sako Ltd. of Finland has impressed the world with its passion for quality and its commitment to offering shooters the best rifles that technology can offer — without compromise. Sakos are regarded the world over as truly custom rifles at production prices. Beretta is proud to call this brand a prominent part of its family.

Classic straight comb with shadow-line cheekpiece.

SAKO'S FIRST NEW PRODUCT IN A DECADE WORLD'S FINEST PRODUCTION RIFLE

SAKO 85 HUNTER

The new Sako 85, a celebration of the rifle maker's 85th anniversary, is a superbly executed medley of tradition, technology and precision. Continuing Sako's time-honored tradition of crafting exceptional rifles for the hunter and target shooter, the Sako 85 incorporates the features most sought after by experienced riflemen: controlled-round feeding, an exceedingly fast lock time, a user adjustable trigger, 70-degree bolt handle lift with a silky smooth bolt travel, and broad flat bedding surfaces. The rifle's stock is crafted from select walnut and features the classic straight comb and shadow-line cheekpiece that premium-rifle owners appreciate. Individually factory tested and guaranteed to shoot five-shot groups of 1 MOA or less out of the box.

The Sako 85 Short Claw Extractor commands total control of the cartridge, engaging the extractor groove of the cartridge as the cartridge rises from the magazine, positively guiding the cartridge into the chamber of the rifle. When single-round feeding, most controlled-round feed rifles require the cartridge to first be placed into the magazine. Not so the Sako 85. The cartridge may be inserted directly into the chamber of the rifle and the bolt closes without any worry of damage to the extractor claw or cartridge rim.

PRECISION AND SPEED EQUALS ACCURACY

The Sako 85 offers the shooter a crisp, single-stage trigger, user adjustable between 1 and 2 kilograms, and an incredibly fast total lock time of under 1.3 milliseconds.

.338 FEDERAL – BIG GAME PERFORMANCE IN A NEW RIFLE CALIBER.

Federal Premium has chosen the Sako 85 as the benchmark rifle for the first-ever cartridge to bear the Federal name.

- A soft-recoiling .338 with magnum performance
- Flatter trajectory than a .308 Win
- More muzzle energy than a .30-06
- Fits in a light .308-length action
- Ideal for all-around continental big game

BIG GAME

SAKO 85 SYNTHETIC STAINLESS

SAKO 85 SYNTHETIC STAINLESS

A masterful blending of Sako performance, tasteful innovation and world-class Giugiaro design, this synthetic-stock rifle features a controlled-round feeding all-stainless action and a match-grade, free-floating, hammer-forged stainless steel barrel. No matter how long a downpour, this rifle will be ready to hunt. The FinSoft recoil-absorption system dramatically reduces felt recoil, especially in the shooter's cheek as the comb line moves down under recoil.

SAKO 85 SYNTHETIC STAINLESS

ACTION	3-LUG BOLT ACTION
CALIBER	15 CALIBERS, SEE CHART PAGE 50
STOCK	SYNTHETIC W/OVERMOLDED GRIPS, BLACK
RECOIL PAD	FINSOFT, BLACK
SAFETY	TWO-POSITION LOCKING TRIGGER, BOLT HANDLE AND FIRING PIN
TRIGGER	SINGLE-STAGE, ADJUSTABLE
SIGHTS	INTEGRAL TAPERED SCOPEMOUNT DOVETAILS
MAGAZINE	DETACHABLE, 5-ROUND CAPACITY, 4 W/WSM
WEIGHT	S ACTION 2.9 KG / 6.4 LBS, SM AND M ACTION 3.0 KG / 6.6 LBS

Every Sako barrel is cold-hammer-forged and finished in-house to ensure match-grade accuracy. The muzzle crown is carefully cut by hand and final inspection is done using the most complex and highly refined optical fine tuning instrument known to man: the human eye.

SAKO 85 SYNTHETIC EXCLUSIVES

Synthetic-stocked rifles frequently weigh less than their wood counterparts and, therefore, recoil slightly more. The innovative FinSoft recoil pad system absorbs and dissipates recoil forces away from the cheek, in more than one direction. Left-handed shooters can convert the stock with an accessory cheekpiece (not included).

SAKO REQUIRES THAT EVERY RIFLE MUST FIRE A 1-INCH, 5-SHOT GROUP FROM 100 YARDS, PRIOR TO LEAVING THE FACTORY.

SAKO 85 LAMINATED STAINLESS

SAKO 85 LAMINATED STAINLESS

A natural-born Finnish hunter, the Sako 85 Laminated Stainless features the same all-stainless barreled action as its cousin, the Sako 85 Synthetic Stainless combined with an attractive, natural-feel, ultra-tough checkered grey laminated stock. The stainless barreled action and warp-free stock make this rifle perfect for hunting in extreme conditions while retaining the traditional warm look and feel of the wood stock.

SAKO 85 LAMINATED STAINLESS

ACTION	3-LUG BOLT ACTION
CALIBER	14 CALIBERS, SEE CHART PAGE 50

SAFETY	TWO-POSITION LOCKING TRIGGER, BOLT HANDLE AND FIRING PIN
TRIGGER	SINGLE-STAGE, ADJUSTABLE
SIGHTS	INTEGRAL TAPERED SCOPEMOUNT DOVETAILS
MAGAZINE	DETACHABLE, 5-ROUND CAPACITY, 4 W / WSM
WEIGHT	S ACTION 3.3 KG / 7.25 LBS, SM AND M ACTION 3.4 KG / 7.5 LBS

The bedding of the receiver is critical to the accuracy of any rifle. The flat bottom and side profiles of the Sako 85 receiver in conjunction with the innovative recoil lug, integral to the stock, allow stockmakers to mate the receiver to the stock with a degree of precision which is far more difficult to achieve with round profiled receivers and conventional recoil lugs. These flat surfaces also reduce the torque twist of the receiver against the stock bedding surfaces that occurs when a rifle is fired, prolonging the accuracy of the bedding.

The lengthened rear bolt guide makes an already smooth action even smoother. Typically, the shorter the action the more susceptible it is to bolt bind due to decreased bearing surface area. The lengthened rear bolt guide surface of the Sako 85 ensures the smoothest possible bind-free bolt travel, even in the very popular WSM chamberings.

BIG GAME

SAKO QUAD

sako
quad

One rifle now allows you to own any or all of the four most popular rimfire cartridges available. Truly unique in the world of rimfire rifles, the Sako Quad lets you select any of the four interchangeable cold-hammer-forged rifled barrels and change them in seconds. The barrels may be removed and replaced without change in the point of impact. The Sako Quad features a supersmooth bolt throw with a short 50-degree bolt handle lift, detachable magazine, and user adjustable trigger system. Complete rifles and optional spare barrels chambered for .22 LR, .17 HMR, .22 WMR or .17 Mach2 are available.

SAKO QUAD HUNTER

New for 2006 – 2007, the Sako Quad Hunter features an attractive oil-finished walnut stock that will please even the staunchest traditionalists. Sako craftsmen have created a new checkering pattern integrating the distinctive “shark-gill” design of the original Quad Synthetic with traditional cut checkering. Like the Synthetic, the Quad Hunter features a detachable magazine, adjustable trigger, and minute-of-angle accuracy.

SAKO QUAD SYNTHETIC

The Sako Quad Synthetic defines versatility and durability in the rimfire rifle world. The Quad Synthetic marries all the precision and innovative features of the Sako Quad barrel and action system with the rugged durability and stability of a fiberglass-reinforced copolymer synthetic stock.

SIGHTS		WITHOUT
WEIGHT	2.7 KG / 5.9 LBS	2.6 KG / 5.75 LBS

Barrels can be easily changed by using the Sako Quad barrel tool.

SAKO QUAD

SAKO QUAD COMBO

.17 Mach2, .17 HMR, .22 LR, .22 WMR. Each of these four great rimfire cartridges works best for specific shooting needs. Now, there is no need to ponder over whether you have chosen the best small-bore rimfire caliber. The Sako Quad Combo is one rifle, four barrels, and two unique dual-caliber color-coded magazines. Available in either Hunter Combo or Synthetic Combo.

Each barrel and magazine is color coded for easy recognition. Just match the barrel band color with the correct dot color on the magazine. As an added feature, the magazines provide a unique safety system to prevent insertion with the wrong barrel in place.

A high quality fitted aluminum case with barrel changing tool and room for a scope is supplied as standard with the Sako Quad Combo.

BURRIS SAKO QUAD 3-9X32 MM SCOPE

Color-coded windage and elevation adjustments are matched to the color coding on the Sako Quad barrels. Once calibrated for each of the calibers, a barrel change requires only a turn of the corresponding dial to zero the scope to the appropriate barrel.

BIG GAME

SAKO TRG

SAKO TRG

Sako TRG is a total accuracy concept designed for one job only: to hit the target. This spectacular result of 100% Sako innovation gives you performance that transcends the highest demands for accuracy, reliability and versatility. The TRG is designed to meet individual tasks, and adjusts to each shooter's personal style, build and posture. Super target grade barrels, specially made for TRG (Cr-Mo or stainless), are cold-hammer forged. The solid vault-like action is also hammer forged from special steel alloy. The sturdy bolt with three locking lugs feeds rounds unflinching from the centerline of a detachable staggered magazine. Bolt lift angle is only 60° for fast bolt throw. The target trigger is a fully adjustable two-stage unit. The integral 17 mm axial rails with recoil stop-slots on the top of the receiver allow a quick and perfect scope mounting.

TRG-BIPOD

Especially designed for sniping this new bipod lets the rifle "hang" below the hinge-point offering very steady shooting position even with large and heavy scopes on the rifle.

BUTT STOCK

Adjustable for height and cast-off/on. Cheekpiece adjustable laterally and with spacers also vertically. Specially designed contour allowing for steady and firm firing position

Tactical scope mount for modern three turret tactical scopes (30 and 34 mm tube diameter). The mount has 0.5 degree elevation allowance (30 MOA) for better adjustment range capability in long range shooting.

Highly effective three-chamber muzzle brake.

SAKO TRG

All Sako TRG receivers are drilled and tapped for tactical (Picatinny) rails compatible with USA MIL-STD 1913. Configurations include black or green high-tech aluminum reinforced composite fully adjustable stock (cheekpiece and buttplate) with different finishes on barrel and action. Also available in an all-black stealth configuration featuring black stock with phosphatized barrel and action. Optional TRG accessories include a highly effective 3-chamber muzzle brake, innovative clip-on bipod, extra magazines, auxiliary adjustable sights, mirage strap, scope mounts, Picatinny interface, sling and swivels, cleaning kit, logistic transportation case as well as spacers for cheekpiece and butt plate.

SAKO TRG 42

The TRG 42 in 300 Win Mag and 338 Lapua Mag is a true long-range precision tool already adopted by numerous military and law-enforcement special units worldwide and also suitable for competition. The 338 Lapua Mag. caliber is also suited for antimaterial purposes. The rifle can be equipped with various accessories to fulfill the demands of tactical snipers.

SAKO TRG 22

The TRG 22 in 308 Win handles a multitude of accuracy tasks: it is a thoroughbred 300 m ISSF standard competition rifle, a CISM competition winner and serves the governments of several nations as their primary sniper rifle.

BIG GAME

TIKKA T3 SERIES

Redefining what a hunter can expect from a rifle in its modest price range, the Tikka T3 is taking the American market by storm. The principle around its design is bold: with today's available technology, there is no excuse not to incorporate the most desirable features in a rifle. So the engineers at Sako in Finland and the designers at Giugiaro in Italy went to work. The result is truly the finest production rifle available to the American shooter, a rifle that incorporates an action, an adjustable trigger, distinctive styling at a truly unbeatable price tag. But most importantly, each one of these rifles only leave Finland after grouping three shots under 1 inch at 100 yards, making them an industry benchmark for out-of-the-box accuracy.

TIKKA T3 DELUXE

The most striking member of the Tikka hunting-rifle lineup, the Tikka T3 Deluxe's high-quality walnut stock sports an oil finish and is embellished by a rosewood fore-end tip and grip cap. To please even the most traditional of tastes, the T3 signature tripartite checkering is blended with a classic three-point design, making the T3 Deluxe a showstopper in all regards. The rifle's action is the already-legendary T3, rightfully known for its smooth bolt operation and crisp trigger-pull. The hammer-forged barrel is renowned for its accuracy.

Tikka barrels are precision cold-hammer-forged and free floated from the stock. The muzzle is hand crowned for a perfect finish, allowing for the highest degree of shooting accuracy.

TIKKA T3 SERIES

TIKKA T3 HUNTER

The Tikka T3 Hunter features a glass-smooth action, a crisp, adjustable trigger, free floated match-grade hammer-forged barrel and a perfect mating between stock and metal. No Tikka T3 is even put on the shipping dock unless it groups 3 shots within 1 inch or less at 100 yards. Besides this fabulous performance, the T3 Hunter features a blend of Giugiaro distinctive checkering with the classic elegance of wood.

The detachable magazine is a straight, true feeding 3- or 5-shot, single-column design for fast and sure repeating. Made of a strong fiberglass composite, ensuring durability.

TIKKA T3 LITE STAINLESS

Synthetic stocks are the choice of hunters who must face tough weather conditions. With its stainless steel finish, the Tikka T3 Lite Stainless offers even better resistance to the elements. The lightweight, injection-molded stock is a godsend to hunters who spend long days in the mountains, as is its guaranteed accuracy. With a Giugiaro-designed stock, this rifle's harmonious and functional layout is both handsome and fast handling.

The two-position safety catch is easy and precise to operate. When engaged, it blocks the bolt and trigger. When the two red dots shown are exposed, it indicates the rifle is ready to fire.

BIG GAME

TIKKA T3 SERIES

GIUGIARO
D E S I G N

TIKKA T3 LITE

Inspired by the strengths of the mighty game animal, the Tikka T3 Lite is perfect for the hunter who chases his quarry in dense woods or from a tree stand, or for the rancher who likes to keep a versatile rifle handy. Just as accurate as its full-size brothers, this synthetic features a quick-handling 19-inch cold-hammer-forged and free-floated barrel. Durable fiberglass-reinforced polymer stock with a straight comb and ambidextrous palm-swell.

TIKKA T3 LITE

A short bolt-lift angle of 70 degrees combined with a bolt throw to match the cartridge length means quick and smooth bolt cycling.

TIKKA T3 VARMINT

Serious varmint hunting and benchrest shooting require the hyperaccuracy of the Tikka T3 Varmint. The cold-hammer-forged barrel has a true varmint-style "bull" contour for maximum rigidity and absolute performance. The stable synthetic stock incorporates a high comb and wide forearm for better stability. As with all Tikka T3 rifles, the muzzle crown is concave and hand-turned — a custom feature that will enhance the performance of your rifle by protecting the lands and grooves from anything that may come into contact with the muzzle.

The ridged Tikka receiver is topped off with integral rails for use with Optilock mounts. This action is also drilled and tapped for use with conventional bases.

TIKKA T3 TACTICAL

TIKKA T3 TACTICAL

When it comes to accuracy, the Tikka T3 Tactical is in a class of its own. The free-floating barrel is made of match grade Cr-Mo steel and manufactured by a precision cold-hammer forging process. The action and the barrel surfaces are manganese phosphatized for lasting protection against the elements and wear. The modern Teflon coated bolt has two front locking lugs and springloaded plunger ejector with 70 degree opening angle for fast, smooth and reliable operation. The 2-way safety locks both the bolt and the trigger. The trigger unit is adjustable with hand-honed sear/trigger without creep. Single set trigger is optional.

The detachable straight-feeding single column magazine is silent, durable and non-rusting. The standard 5/6-round magazines are tailored for each caliber for ultimate reliability and performance. New color coded magazines optional make the use of different loads easy to separate.

The stock is made of fiberglass reinforced copolymer polypropylene. The cheek-piece is adjustable at 5 mm interval up to 25 mm. The adjusting wheel can be fitted on either side of the stock.

ACCESSORIES

The standard Picatinny rail takes any Weaver or U.S. Mil. Std. 1913 compatible mounts. Scope, scope mounts, bipod, muzzle brake and heavy duty swivel studs are optional, as well as adjustable open sights and fore-and rear-stock fastened military type heavy duty sling studs for hook-type swivels.

BIG GAME

RIFLED SLUG GUNS

In many areas of the world, the Rifled Slug Gun is the firearm of choice for non-dangerous big game hunting and there is no finer choice than the Beretta series of Slug Guns. Both Beretta Slug Guns feature 24-inch barrels with a rifling profile optimized for superior accuracy with sabot-style slugs. These barrels feature chrome-lined chambers and bores for ease of cleaning and rust resistance. The integral cantilever Picatinny scope-mount rail of the XTrema2 ensures constant ridged alignment of the scope to the barrel for maximum accuracy and accepts common Weaver-style scope rings, such as Sako Optilock and Burris systems.

XTrema2

A391 XTREMA2 SYNTHETIC RIFLED SLUG

No other autoloading shotgun can match the Xtrema2 on reliability, recoil reduction, and simplicity of maintenance. Featuring Aqua technology for extreme environmental protection, the Xtrema2 Synthetic Rifled Slug Gun is constructed of advanced corrosive-resistant materials in all its internal and external components.

ES100 RIFLED SLUG

Designed for wild-boar and deer hunting, the ES100 Rifled Slug gun is a 12-gauge, inertia-operated semiautomatic with a 3-inch chamber. Its one-piece receiver and barrel design enhance accuracy by keeping a scope properly aligned with the barrel. Heavier contour makes the barrel more rigid and the gun softer-recoiling. The traditionally checkered stock and fore-end are made of selected walnut. Front and rear sight are fixed.

ES100 RIFLED SLUG

The one piece receiver and barrel design locks these key components together for maximum precision. This stability further enhances accuracy by keeping a scope properly aligned with the barrel.

SLUG GUNS

471 SILVER HAWK SLUG

Remarkably light and responsive, the Beretta 471 Silver Hawk Slug side-by-side unites almost 500 years of tradition and elegance with modern and innovative technology. Its short cylindrical barrels are specially designed to guarantee the best target acquisition and the maximum stopping power. Adjustable rear sight with folding leaf and ramp front sight, wraparound beavertail fore-end and rubber recoil pad feature in this model destined for the traditional hunting of hooved animals.

AL391 STONECOAT SLUG

With the proven self-compensating Beretta gas system and the exclusive recoil reducing Gel-Tek pad, the Beretta AL391 Stonecoat Slug performs a superb recoil control. Its special multilayered finish of nickel and chrome with final protective layer of titanium and zirconium will protect it from wear and corrosion. The special rib with adjustable V-shaped rear sight and the blade front sight with hood are standard. The receiver is designed to accept a weaver base to accept optics or other aiming systems.

AL391 URIKA2 CLASSIC SLUG

The new Urika2 Classic is now available also in this performing Slug version offering the ultimate features of the new self-cleaning gas system and the new X-Tra Grain wood enhancement treatment. A fine-line scroll engraving on both side panels of receiver distinguishes this model.

BIG GAME

EXPRESS DOUBLE RIFLES

Rugged, reliable, accurate and lightweight, the Beretta Express 689 Sable over-and-unders have the power to stop game with the first shot, and the quick second-shot reliability to ensure an accurate follow-up shot if necessary. The 689 Sable are built on Beretta's reliable 20 gauge box lock shotgun frame and boast rifle-type firing pins and breech faces toughened to handle large centerfire cartridges. Barrels are rotary forged and precision-rifled to deliver remarkable accuracy. The short upper rib is designed to accept Weaver bases for scopes or other aiming systems. The V-notch rear sight features red luminous points. On request, they can be supplied with hook-in base for scope or with claw mounts. Formed from carefully selected walnut, the stock and fore-end have a European-style cheek rest.

689 GOLD SABLE

The 689 Gold Sable is available with light scroll engraving on the color case-hardened receiver and superior solid rib. The stock and fore-end are of the finest walnut.

689 SILVER SABLE II

Magnificent bas-relief engravings on the sides of the receiver show wildlife in their natural habitat, while all exterior metal surfaces are subtly decorated. The exclusive Beretta nickel based treatment protects the receiver from atmospheric damage.

CHIARA CAINERO (ITA) - SKEET - WORLD CUP 2006: GOLD MEDAL. EUROPEAN CHAMPIONSHIP 2006: GOLD MEDAL. WORLD CHAMPIONSHIP 2006: SILVER MEDAL

The scorecard, the moist palms, and the lineup of like-minded competitors might indicate otherwise. But as the clays fly across your line of vision, you stand alone, competing against no one but yourself. Every inch of your being is focused, balanced, alert, working in unison. There's no denying you are here to win, to stand proudly on the podium. But more than anything else you are here to perform unfalteringly. To prove you've shot your very best.

To compete successfully, the Victory shooter requires dependable performance. Not just from themselves, but from their shotgun and the specialized apparel and accessories that work together to give them a competitive advantage. Designed for maximum performance in any event, Beretta's competition guns and clothing are the epitome of the craft, a testament to optimum control and reliability—as gold medal winners worldwide will attest.

VICTORY

DT10 TRIDENT

DT10 TRIDENT TRAP

Features, dimensions, weight, balance, point of impact...everything in Beretta's competition over-and-unders, the DT10 Trident, has been professionally refined to meet and surpass the technical requirements of serious competition. You'll never have to worry about a broken spring or clogged mechanism thanks to the DT10's quick-detach, removable trigger group. Specific features are the international style select walnut stock, the competition beaver tail fore-end, the special top rib with white or red front sight.

DT10 TRIDENT X TRAP COMBO

A shotgun that's at home at any level of competition, from league night at your home club to the Olympics, the DT10 X Trap Combo is Beretta's top-of-the-line competition shotgun. In addition to the over-and-under Optima-Bore® barrels with Optimachoke® tubes an interchangeable bottom single barrel with adjustable top rib is supplied. The Montecarlo adjustable stock features the patented Memory System. Wide beaver tail fore-end, tapered progressive top rib, white front sight with mead bead are standard.

DT10 TRIDENT

DT10 TRIDENT SKEET

For skeet devotees, there's no finer choice than the DT10 Trident Skeet, no matter what level of competitive shooting you participate in. The skeet version with adjustable stock allows you to regulate your personal sight picture. Beretta's patented "Memory System" lets you remove and replace the comb without losing your individual settings. The Optima-Bore® barrel system with Optimachoke® tubes improves shot pattern distribution and velocity, felt recoil reduction.

DT10 TRIDENT SPORTING

For the sporting clays, the DT10 Sporting is the shotgun of choice. Like all Beretta DT10s, it features an ergonomic top lever and a detachable trigger assembly that can be removed from the receiver without tools for cleaning or maintenance. This masterpiece also offers a modified cross-bolt locking system with superior strength and Optima-Bore® barrels with Optimachoke® tubes. The single trigger is selective, the stock boasts a rounded rubber recoil pad, the fore-end is Schnabel.

DT10 TRIDENT

The initials "DT" are an abbreviation of "Detachable Trigger", emphasizing the efficiency and simplicity of the new trigger group release system.

687 EELL DIAMOND PIGEON SPORTING AND 682 GOLD E SPORTING

687 EELL DIAMOND PIGEON SPORTING

One of the most elegant, finely balanced and responsive double barrel shotguns in the world, the 687 EELL Diamond Pigeon 12 gauge is the epitome of luxury and performance for the competitive shooter. Beretta's extensive hand-chased engraving and highly figured select walnut set this shotgun apart from all others. Just like the field version in every luxurious detail with the added benefit of a wider rib for better target acquisition.

682 GOLD E SPORTING

Designed to be shot hard with conical locking lugs engineered to compensate for the wear of thousands of rounds, the 682 Gold E Sporting has all the features to keep you at the top of your game. The recoil shoulders are replaceable (a must for avid shooters), the palm-swell allows for a more positive grip and the Optimachoke tubes give you smoking clay patterns. This is a beautiful shotgun, from the select walnut to the elegant engraving.

"WHEN I PURCHASED MY 682 GOLD E SPORTING I WAS VERY IMPRESSED BY THE LEVEL OF FIT AND FINISH. THE FIRST TIME I SHOT A ROUND OF SPORTING CLAYS WITH IT, I SHOT A 47 OUT OF 50. THE SECOND TIME, I SHOT 49 OUT OF 50. I AM PROUD TO SAY THAT I OWN SEVERAL BERETTA OVER-UNDERS AND THIS WON'T BE MY LAST. THE 682 GOLD E IS AN AMAZING SHOTGUN. THANK YOU, BERETTA, FOR EXCEEDING MY EXPECTATIONS."

— Jason Valiga, Beretta Customer

682 GOLD E

682 GOLD E TRAP

Whatever your target discipline, the 682 Gold E can help you dominate. For the trap shooter, you'll find the 682 Gold E Trap perfect for your passion. It features a select walnut stock in international style with rubber recoil pad and beaver tail fore-end, gold non-selective single trigger, adjustable for length of pull. And the distinctive receiver engraving and inlay pattern immediately identify it as a target gun. On request, a fully adjustable stock with Memory System is available.

682 GOLD E SKEET

Special skeet stock with rounded rubber recoil pad, beaver tail fore-end, tapered top rib with white front sight, non-selective adjustable single trigger and special Beretta skeet chokes characterize the gold medalist 682 Gold E skeet. This model is also available with Optima-Bore® barrels that reduce felt recoil and Optimachoke® or Extended Optimachoke® tubes ensuring consistent shot distribution and the adjustable stock with Memory System .

686E BLACK AND 686 WHITE ONYX SPORTING

686 E BLACK SPORTING

The 686 E is today produced also in a new and more exclusive special series, the 686 E Black, limited to 1100 pieces. Only 300 numbered 686 E Trap and 800 numbered Sporting models will be available. Both the 686 E Black versions feature, on the receiver, the same modern ellipsis graphic motif of the original model and a new exclusive matte/glossy black finish. The characteristics of 686 E Black Sporting and Trap models are the same of correspondent 686 E versions.

686 WHITE ONYX SPORTING

Designed to fulfil everything shooters look for in a competition shotgun, the Beretta 686 White Onyx Sporting over-and-under proves that you can still get brilliant results on a reasonable budget. It features a receiver machined with the Beretta distinctive Dura-Jewel pattern and a nickel-alloy finish contrasting with the satin side panels and the gold-plated trigger. The Optima-Bore® barrels reduce felt recoil and the Optimachoke® tubes guarantee a perfect shot pattern and a regular distribution of pellets.

AL391 URIKA2

AL391 URIKA2 PARALLEL TARGET SL

Made for those who want perfect shooting, the AL391 Urika2 Parallel Target boasts the same improved self-cleaning gas system and receiver finish of field grade models. It comes with a Monte Carlo stock with parallel comb and reduced grip radius. This facilitates the grip and instinctive pointing, especially for individuals with smaller hands. The shotgun has all the professional characteristics of the Beretta competition semiautomatics as the stock preset to lodge the Recoil Reduction System device.

AL391 URIKA2 GOLD SPORTING

Designed especially for the Sporting discipline, the Urika2 Gold Sporting boasts a special competition sporting stock with a rounded rubber recoil pad, wide, ventilated rib with luminous red or white front sight. Optima-Bore® barrel with Extended Optimachoke® tubes. Engraved floral motifs and "gold" markings decorate the glossy side panels of the receiver. The bolt and carrier are jeweled. Stock and fore-end are made with selected walnut. The Recoil Reduction System is optional.

AL391 URIKA2 SPORTING

The Beretta improved gas system of the Urika2 makes these semiautomatics some of the softest shooting autoloaders – right out of the box – reducing felt recoil and improving second shot recovery. The adjustable drop and cast system ensures a custom fit for every shooter. The optional Recoil Reduction System device can be lodged in the X-Tra Grain stock.

Top:
AL391 Urika2 Sporting offers a fine-line scroll engraving and an X-Tra Grain wood enhancement treatment of stock and fore-end.

Right:
AL391 Urika2 Gold Sporting boasts an extended scroll engraving with "gold" markings and jeweled bolt and carrier.

VICTORY

THE BERETTA TEAM

Can you imagine winning the World Shotgun Championship at 16 years old? The U.S.A.'s Vincent Hancock did just that this past year in Lonato, Italy, with an out-of-the-box Beretta DT10. He became the youngest shooter ever to win the world championship.

Hancock joins a prestigious list of some of the most respected and talented names in the sport of competitive shooting who embody the winning spirit of Beretta. From the Olympics to regional shoot-offs, a Beretta is usually in the hands of the champion. Beretta's gallery of champions from around the world are a testament to their skill, determination and performance under pressure. Like Beretta's competition guns, they represent the epitome of their craft.

VINCENT HANCOCK DT10 TRIDENT

In the world of international skeet shooting, Vincent Hancock of Eatonton, Georgia, has been simply dominant. At just 16 years old, he won a gold medal win at his World Championship debut, becoming the youngest shooter to be crowned world champion. He has set every men's skeet world record while accomplishing what no one else has ever done: win seven medals in seven major International Shooting Sports Federation competitions.

CHIARA CAINERO DT10 TRIDENT

Chiara Cainero of Italy has dominated the skeet international competitions during year 2006. World Cup winner, silver medalist at the World Championship, she won also the gold medal at the European Championship.

HALEY DUNN DT10 TRIDENT

At 21 years old, Dunn burst onto the international skeet shooting scene by setting a World Record and Junior World Record at the 2005 World Cup in Korea. Dunn followed that up with gold at the Championships of the Americas and the World Cup Finals in Dubai. She had the top finish for the United States in women's skeet at the 2005 World Clay Target Championships and won the 2005 ACUI Clay Target Championship in women's international skeet and five stand.

THE BERETTA TEAM

ANDREA BENELLI

DT10 TRIDENT

Olympic champion Andrea Benelli of Italy won gold in men's skeet at Athens in 2004 after taking the bronze in Atlanta in 1996. Overall, he has captured eight gold, four silver and three bronze in the World Championship. Benelli's amazing gold medal career also includes 16 gold at the Trial World Cup, nine gold at the Italian Championship and eight at the European Championship.

SCOTT ROBERTSON

AL391 TEKNYS GOLD SPORTING

For three-time World Champion and eight-time National Champion, Scott Robertson stepping to the awards stand has almost become as much a part of his life as shooting. A gold medalist at the 2003 ESPN Great Outdoor Games and 13-time All American, Robertson of Flower Mound, Texas, has Pan-American, Caribbean Cup and Ducks Unlimited National championships among his many accomplishments.

AHMED AL-MAKTOUM

682 GOLD E

A member of Dubai's ruling family and a former national squash champion, Ahmed Al-Maktoum entered the Olympic record books as the first-ever medalist from the United Arab Emirates when he blasted to gold in men's double trap shooting at Athens in 2004. Al-Maktoum, who did not take up shooting until the age of 34, has also taken gold at four World Cups, a World Championship and an Asian Championship.

INTRODUCING PISTOLS AND CARBINES

Whether testing your skills in competition, polishing them at the target range, or defending your home and family, there are certain things you demand from your firearm. Tops among these demands are absolute reliability, consistent accuracy, and optimal safety. But beyond these essential traits, your pistol or carbine is an extension of your personality. Your preference may run to the fastest or lightest or most technologically advanced. Or to the familiar standbys that still feel perfect in the palm and right on the money at the range.

As a Beretta Shooter, you can also expect innovation, versatility, and superior design and workmanship. Because in the handgun stakes, Beretta wins—hands down. The automatic choice of marksmen, sportsmen, and military worldwide, Beretta pistols and carbines carry with them their own cachet and reputation. And deservedly so. A Beretta firearm is both a triumph of design and reliable performance, offering the user the most advantageous combination of form and function.

PISTOLS AND CARBINES

90two

90TWO

The revolutionary Beretta 90two pistol introduces new improvements to form, fit and function while maintaining the integrity and reputation of its predecessor, the legendary Beretta 92/96 Series. Featuring a technopolymer removable single-piece wraparound grip in two sizes (standard and slim), increased magazine capacity, internal recoil buffer (softer shooting, less felt recoil), captive recoil spring guide assembly and quick assembly feature, the 90two has evolved to individually fit the hand of each operator, while maintaining accuracy and reliability.

The 90two comes with a large array of safety features:

90two Type F. Double/single action. Ambidextrous manual safety on the slide with hammer decocking function, automatic firing pin block safety.

90two Type G. Double/single action. Ambidextrous manual lever on the slide with hammer decocking function with the return of the lever to the firing position, automatic firing pin block safety.

90two Type D. Double action only. Without manual safety-hammer decocking. The spurless hammer, after each shot, returns to the decocked position. Automatic firing pin block safety.

PISTOLS AND CARBINES

THE NEXT GENERATION HAS ARRIVED. SPECIAL HANDGUNS FOR SPECIAL TASKS

The new removable single-piece, ergonomic and modular grip unit allows for quick and easy grip replacement. The rear upper part is precisely curved and relieved for a firmer, more comfortable grip and to snugly fit the shooter's hand.

Located forward and under the barrel for light and laser accessories, the accessory rail is machined integral to the frame. An accessory rail cover protects the rail and permits the pistol's smooth insertion into the holster.

With innovative lines and rounded corners, the 90two incorporates new benefits while maintaining all the advanced performance and safety features that made the 92 pistol series an international legend. The interchangeability and modularity of the components, together with the integral accessory rail and removable grip unit make this pistol ready to meet any operational requirement.

92FS

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS, Beretta's premier full metal gun, most resembles the military M9 9mm pistol. Accurate out of the box, this workhorse features an open slide design that virtually eliminates jamming, a safety system that combines decocking with a positive thumb safety, and a combat muzzle crown. Beretta's proprietary black, non-glare Bruniton finish gives your 92FS a wear-resistant coating, which means it will stand up to any special duty.

92FS INOX

The slide, barrel and many other key components of 92 FS Inox are made with stainless steel. The alloy frame is anodized to match perfectly the color and finish of inox parts. The rubber grips come with a stippled texture and hex key grip screws.

"I WAS ON A RECOVERY MISSION LAST YEAR IN THE SADR CITY DISTRICT OF BAGHDAD TRYING TO RECOVER AN M1A1 TANK THAT WAS HIT BY INSURGENTS. IN THE PROCESS OF CONDUCTING THE MISSION, MY TANK COMMANDER WAS INJURED, LEAVING ME IN COMMAND OF MY TANK. WITH NO SUPPORT ON MY FLANKS, I WAS PRETTY EXPOSED. A GROUP OF IRAQIS BEGAN TO CONVERGE ON MY TANK, GESTURING FOR AN RPG TEAM. WITH NO ROOM TO TRAVERSE MY TURRET, I STOOD UP IN MY HATCH AND SUPPRESSED THE GROUP BY DISPERSING THEM WITH MY M-9. IF THEY HAD GOTTEN THAT SHOT OFF AT MY FLANK, I MAY NOT BE HERE TODAY. THANKS, BERETTA, FOR A GREAT PRODUCT AND SUPPORTING MY PLATOON."

— Staff Sergeant, Michael Blake, U.S. Army

.22 LR PRACTICE KIT

Build your shooting skills with the optional .22 conversion Practice kit for the 92FS. It's easily installed and removed.

92 STEEL-I, 92 G ELITE II

92 STEEL-I

The Beretta Steel-I is the synthesis of the long-standing experience made with the model 92 and reconfirms Beretta's attention to steel framed semiautomatic pistols. Designed with extreme care to detail, the Steel-I is created with true connoisseurs, expert marksmen and collectors in mind. The pistol is available in calibers, in the traditional single/double action version. The exclusive Steel-I model sports numerous special features, like the frame manufactured with high resistance steel, an ergonomic vertical grip also suitable for small handed shooters, a slide widened near the slide rails, an ambidextrous frame mounted safety lever, a skeletonized hammer to reduce lock time. The Beretta Steel-I pistols are qualified to compete in the IDPA competitions.

With the safety on, the 92 steel-1 is in the cocked-and-locked position.

92G ELITE II

The Elite II is a unique pistol featuring an heavier recontoured slide which helps to reduce the felt recoil. The slide is stainless steel and boasts removable front sights and Novak type rear sights. The stainless steel barrel is slightly shorter (119 mm / 4.7") for compactness. The pistol's grip is grooved to enhance control during firing, the beveled magazine well facilitates rapid reloading, front and rear slide serrations provide a sure grip for fast, easy racking of the slide, the skeletonized hammer reduces lock time and the rubber magazine pad protects the magazine if it is dropped.

PISTOLS AND CARBINES

Px4 Storm

PX4 STORM

The Beretta Px4 Storm was built around the belief that a firearm should be individualized to the operator. The Px4 Storm includes multiple operating systems and a choice of three backstraps, three magazine release buttons, and two slide catch lever sizes. This is a gun you can make fit for your purposes. Extremely easy to disassemble without tools, the Px4 Storm personifies simplified field stripping: it cannot be reassembled incorrectly! Without compromising on Beretta's legendary ergonomics, reliability and performance, this lightweight technopolymer frame pistol defines *Individualized Performance*.

Interchangeable grip backstraps and multiple-sized, reversible magazine release buttons allow for customization to the individual's hand size.

In the Px4 Storm Type G model, the safety lever on the slide keeps the hammer-decocking function only. When released, it will return automatically to the firing position.

"I AM A SINGLE FEMALE (MOM) AND JUST PURCHASED MY FIRST FIREARM FOR SELF-HOME PROTECTION. AFTER CONTEMPLATING SEVERAL COMPETITORS' MODELS, I WENT WITH THE PX4 STORM, 9MM AND I AM SO GLAD THAT I DID. THE QUALITY OF BERETTA IS WHAT SOLD ME ON THE PISTOL. I ALSO LIKE THE FLEXIBILITY THE PX4 STORM OFFERS WITH DIFFERENT SIZED GRIPS TO MAKE A CUSTOM FIT TO MY HAND."

— Brenda, Beretta Customer

CUSTOMIZE TO YOUR HAND AND SHOOTING STYLE
INDIVIDUALIZED PERFORMANCE.

PX4 STORM .45 ACP

To those who prefer a bigger ammunition capable to deliver at first shot more stopping power, Beretta dedicates its new Px4 Storm 45 ACP, boasting the same dimensions and ergonomic advantages of the Px4 family.

PX4 STORM SD

The Px4 Storm SD is a real Special Duty pistol, chambered for the full power .45 caliber, conceived for extreme tactical use in any environmental conditions. It offers the best materials and surface treatments in order to meet salt spray and endurance tests and mud, ice, sand and marine underwater deployment.

Standard Super-Luminova sights give high targeting performance in all types of light conditions. With minimal exposure to light (or flashlight), this luminous material is "charged" and visible in low light.

Military Standard 1913 "Picatinny" standard accessory rail. Allows mounting of optional tactical lights and laser units.

8000F COUGAR L AND 84FS CHEETAH

8000F COUGAR L

Ergonomically advanced, with a user-friendly, contoured frame, the Beretta 8000 F Cougar L semi-auto pistol is exceptionally easy to control during firing thanks to its exclusive rotating barrel system. The shortened and redesigned grip can allow a high-capacity 13-round double-stack magazine.

84FS CHEETAH NICKEL

Back by popular demand, the nickel finish 84FS Cheetah Nickel with checkered walnut grips is light, fast handling and ideal for personal defense. Its 9mm Short (.380 Auto) caliber is just right for those who prefer the light recoil and report of a higher caliber, smaller pistol. Very accurate out of the box, its ambidextrous safety is easily accessible by the thumb for right- or left-handed shooters.

U22 NEOS

u22 neos

U22 NEOS DELUXE

The U22 Neos semiautomatic pistol is a single-action, 22LR caliber firearm designed and manufactured in America by Beretta USA Corp. The advanced shooter demands more control, and gets it in the U22 Neos Deluxe. The best in off-hand accuracy comes from a trigger adjustable for take-up and overtravel. Front sight posts in black, red and white match rear sight leaves outlined in the same colors. An aggressive grip molding pattern makes the grasp secure when match pressure gives even the seasoned competitor moist palms.

U22 NEOS

Designed for the entry-level pistol shooters, the U22 Neos is ideal for training and plinking but can be adapted to the advanced shooter's needs. Despite being richly accessorized, the Neos is on the market at an affordable price. The pistol features cutting-edge design, modular construction that allows personalization, and the flexibility for many shooting disciplines. This is a pistol that won't easily be outgrown as skills improve.

ACCESSORY REAR AND FRONT SIGHTS

CO₂ PISTOLS

92FS/CO₂

The 92 FS/CO₂ pistol, manufactured under Beretta license by Germany's Umarex, is operated by a CO₂ capsule lodged within the grip (capable of more than 50 shots). The pistol comes supplied with 2 magazine cartridges containing 8 shots of .177" (4.5 mm) caliber pellets.

The 92FS/CO₂ is available in a polished black or nickel-plated finish. Thanks to the weight (close to that of the original 9 mm model loaded) and the limited noise factor, the pistol is ideal for training also in enclosed environments.

As this gun is considered to possess a "modest capacity of wounding", it is free of restrictions in terms of purchase in most countries.

A-9000S CO₂

Manufactured under Beretta license by the Russian Anics Group, the A-9000S CO₂ pistol is operated by a CO₂ capsule lodged within the grip (capable of firing up to 70 shots). The pistol boasts a patented revolutionary magazine, with conveyer-type mechanism, able to hold 22 pellets 4.5mm (.177") caliber. Any type of pellets can be used in any sequence. A-9000S maintains full functional conformity with the Beretta 9000S pistol: as the original model, it fires in double or single action; the ambidextrous manual safety, also acts as a decocking mechanism, dropping the hammer to the half-cocked position; the empty magazine can be quickly removed from the grip pushing the release button. The pistol comes supplied with a spare magazine.

CX4 STORM

CX4 STORM

Accurate, easy to use, field strip and accessorize, the Cx4 Storm fits every need of the American pistol shooter. Today's shooter demands a gun that can accept a large assortment of accessories, and the Cx4 caters to all tastes. A retractable accessory rail extends from the fore-end for mounting tactical lights. Rails can be installed on either side or the bottom of the fore-end for lasers or forward grips. Redefining the pistol-caliber carbine, with racy and radical lines from the masters of industrial design at Giugiaro. The Cx4 Storm's smooth, sweeping curves are made possible by the use of modern high-strength, lightweight technopolymers.

Retractable fore-end rail for mounting of optional tactical lights and laser units.

PISTOLS AND CARBINES

Rx4 Storm

RX4 STORM RIFLE

The Beretta Rx4 Storm is the most advanced semiautomatic rifle ever designed for commercial and law enforcement use. This .223 special purpose rifle emphasizes individual performance with multiple stock configurations, ergonomic adjustment and ambidextrous controls. Designed in a joint effort by Beretta and Benelli engineers, the Rx4 Storm incorporates the most advanced technology in firearms. Using the ARGO (Auto Regulating Gas Operating) system, the gas port is located just forward of the chamber where the gases are hotter and cleaner, resulting in less fouling and more reliable cycling.

Built to the highest industry standards, the Rx4 Storm employs 223 ammunition and is totally reliable in every condition of use.

Ambidextrous magazine release button and bolt release lever. Manual safety button can be assembled on either side.

A LONG LIST OF ACCESSORIES

Rx4 Storm can be equipped with a long list of accessories such as Picatinny rails, tactical sight systems, illuminators, laser aiming devices, front handles, high capacity magazines, Nato Standard magazines, slings, etc.

PISTOLS AND CARBINES

THE MOST ADVANCED RIFLE EVER DESIGNED.

Optional front handle attached to the Picatinny rail.

The telescopic stock is fitted with a rubber recoil pad. The overall dimensions of the gun can be reduced by about 12 cm / 4.7".

A front sight post, protected by "ears" and a fully adjustable aperture sight are standard. Up to 5 Picatinny rails on request.

STURDY AND PRACTICAL

In order to make stripping easier and to allow easy interchangeability of the barrels, the frame of the Rx4 Storm is divided in 2 parts: lower receiver and upper receiver. The lower receiver is milled from a solid bar stock of aircraft grade light alloy; for maximum strength, the upper receiver (permanently affixed to the barrel) is machined from a bar of high quality hardened steel.

PISTOLS AND CARBINES

APPAREL AND ACCESSORIES

THE SAME ATTENTION TO DETAIL AND MANUFACTURING EXCELLENCE THAT BERETTA RESERVES FOR ITS LEGENDARY PISTOLS IS GIVEN TO THE PRODUCTS THAT COMPLEMENT THEM. THEY ARE A NATURAL EXTENSION OF THE BERETTA LIFESTYLE YOU HAVE COME TO LIVE AND LOVE THROUGH OUR FIREARMS.

BS07-11-99
Pouch for pistol and accessories, two big lateral bags.

INTRODUCING
WESTERN GUNS

The heritage of the Old West runs deep in the heart of the Western Shooter. The spin of the cylinder, the glint of the nickel barrel, the sheer thrill of breaking open a six-shooter or the adrenaline rush of firing a fast-handling, pump-action longarm. There's nothing that quite compares to that exhilarating moment when you feel the cowboy mystique running through your veins. To that moment when you test yourself, using those classic firearms that defined a fabled era, against the legends of the American frontier.

To the Western Shooter, authenticity is what matters above everything else. However, at Beretta authenticity does not detract from flawless performance. This is why you'll find an extraordinary combination of both in Beretta's lineup of Old West firearms. These fine firearms are for the Western Shooter who demands absolute truthfulness to the 19th-century originals as far as dimensions, feel and functioning, coupled with Beretta-style reliability, safety and performance.

WESTERN GUNS

GOLD RUSH RIFLE

The Beretta Gold Rush Rifle follows the same philosophy as our successful Stampede revolver: combining the looks and feel of the Old West original with modern safety and reliability. Chambered for the 45LC and the 357 Mag/38 Special, the Gold Rush is a fast-handling pump-action longarm perfect for Cowboy Action Shooting, small-game hunting and informal target practice. Discrete modifications have been incorporated that greatly enhance safety and reliability.

GOLD RUSH CARBINE

Like the Gold Rush Rifle, the Gold Rush Carbine is a testament to authenticity coupled with modern performance. Compared to the original, several enhancements have been made. A solid transfer-bar safety mechanism is housed in the hammer, making the gun absolutely safe to load and unload without having to lower the hammer. Feeding is improved considerably by ensuring that each cartridge is perfectly in line with the chamber. And a redesigned cycling mechanism makes it possible to obtain the desired speeds without jams.

GOLD RUSH DELUXE

The Beretta Gold Rush Deluxe Rifle and Carbine exemplify the same high standards in engineering and performance as the Beretta Gold Rush and Carbine, with some important aesthetic differences. Features of the Gold Rush Deluxe include charcoal-blued barrels, jeweled hammer and trigger and German silver medallion inlaid into the stock. The Deluxe walnut stock and fore-end have special fish-scale checkering, oil finish and Beretta "three-arrow" logo engraved in the checkering pattern.

LARAMIE NICKEL

LARAMIE NICKEL

The Laramie replicates a break-open revolver popular in the Old West for its quality, accuracy and for the speed at which it could be loaded and unloaded. Upon releasing the top latch located in front of the hammer, the revolver could be instantly unloaded by “breaking it open,” thus allowing all six empty shells to fly out of the cylinder. Beretta has improved upon the 19th-century original by reinforcing the top latch, thus making the revolver much more durable and ensuring you years and years of trouble-free enjoyment.

An accurate reproduction, we made the Laramie considerably safer by designing a rebounding-hammer/hammer-block system that allows you to safely carry it with all six chambers loaded.

WESTERN GUNS

“I STARTED SHOOTING WITH A COMPETITOR’S SIX GUN. I HAD A HARD TIME KEEPING THE SAME SIGHT PICTURE EVERY TIME I DREW IT FROM MY HOLSTER. SO I TURNED IT IN AND BOUGHT TWO BERETTA STAMPEDES. THEY WERE DEAD ACCURATE RIGHT OUT OF THE BOX. THE GRIPS WERE THIN AND FIT BETTER IN MY HANDS. I HAVE NOT HAD ANY PROBLEMS WITH THEM AND THEY LOOK GREAT. I LOVE SHOOTING THEM.”

— Robert, Beretta Customer

STAMPEDE NICKEL

There’s no gun more quintessentially American than the single-action revolver. The Beretta Stampede combines the feel and handling qualities of the original “hogleg” with a transfer-bar safety system that makes it safe to carry with all six chambers loaded. The beauty is in the accurate details. The fixed front sight is true to the original. And with the frame dimensions closely matched to the 19th-century originals, the Stampede feels slender and very responsive in the hand.

STAMPEDE DELUXE

The Stampede Deluxe features a frame finished in Beretta Color-Case, which duplicates the classic look of color-casehardening to capture the romance of the Old West. Select walnut grips and a lustrous charcoal-blue barrel and cylinder complete the picture. Whatever your choice, the transfer-bar safety system will allow you to safely load all six chambers without fearing an accidental discharge.

WESTERN GUNS

STAMPEDE MARSHALL

The internal features may be the same as Beretta's other single-action Stampedes, but the walnut birdhead grip gives the Marshall a distinction all its own. Chambered in .45 Colt and .357 Mag, this handsome replica has a 3½-inch blued barrel and cylinder, Beretta Color-Case frame and incorporates the most modern safety features. The feel and functioning are just like the originals, with a multiple-click single-action hammer mechanism and a half-cock position that allows the cylinder to spin free.

STAMPEDE BISLEY NICKEL

Old West firearm connoisseurs will be pleased by how true to the original this replica looks and feels, although it incorporates a transfer-bar safety and is manufactured of durable modern materials. Instead of taking the easy road and "dressing up" this Stampede as a Bisley, Beretta built this revolver from the ground up around a true Bisley frame — which is somewhat taller than that on its standard single-action cousin. The distinctive Bisley grips in imitation Bakelite, hammer and wide trigger are also a precise replica of the originals as far as dimensions, balance and feel.

INTRODUCING
THE 1526 COLLECTION

The sheer beauty is in every luxurious detail. From the rich baroque spirals hand chiseled by Master Engravers to the extraordinary cut of cloth and harmonious stitching found in the world's finest Italian apparel. Here there are no compromises; here only the very best will do. Every shotgun is created of hand-selected wood, hand engraved and hand fitted. Every article of clothing is fashioned from only the finest fabric in impeccable Italian design.

The 1526 Client is the collection that defines Beretta. That represents living at its very best. Not only is this the collection that the Beretta family is most hands-on involved with, this is the lifestyle the Berettas themselves live. This is their legacy; this is their passion. There is, quite simply, no finer example of Beretta's heritage of unflagging dedication to extraordinary performance and outstanding quality than in this collection, which is enveloped in the Italian sense of craftsmanship and style unrivaled worldwide.

THE 1526 COLLECTION

SO10 EELL

Seventy years after the first modern Beretta over-and-under (the S1 launched in 1933), a new true sidelock shotgun is born: the SO10 EELL over-and-under. It is the deserving successor of the famous Beretta SO series hunting and competition shotguns that have earned their reputation, on the Olympic podium and on the most exclusive hunts in the world, from Europe to America to Africa, for being the most functional, elegant and exclusive over-and-unders in the world. Drawing from this very long experience, and under the dedicated guidance of the Beretta family, the most gifted designers and gunsmiths of the company have created the new SO10 EELL, a synthesis of aesthetic refinement, function and performance that place it at the peak of the world's prestigious over-and-under offerings.

In Italian, EL stands for extra lusso (extra luxury). The prized double "E" double "L" designation takes that quality to the highest level of luxury.

Master Engraver Mario Terzi.

ELEGANCE AND CARE

Entirely hand executed by expert craftsmen, the Beretta SO10 EELL over-and-under case is made of solid wood covered in resistant leather. A full range of handmade cleaning and maintenance accessories is provided. Type and color of leather, wood, finishing and accessories vary depending on the model.

THE 1526 COLLECTION

IMPERIALE MONTECARLO

IMPERIALE MONTECARLO

A shining example of what can be achieved when free reign is given to Master Gunsmiths in the crafting of personalized luxurious shotguns and when Master Engravers are able to express their artistry in full, the Imperiale Montecarlo is a masterpiece destined to become a part of gunmaking history. The deeply blued Demibloc barrels of the Imperiale Montecarlo side-by-side boast numerous, exclusive qualities that have determined its fame as a great hunting and competition gun. They begin with the special steel that assures extremely high resistance and outstanding tensile strength and conclude with the exclusive cold blueing of the barrels that give them an extraordinary deep glossy black color. The final result will astonish even the most refined connoisseur.

THE ART OF ENGRAVING

English scrollwork, hunting scenes, floral motifs, deep relief, mixed technique engravings, portraits and more. Any type of engraving is possible on an Imperiale Montecarlo and is executed only by the most expert Master Engravers.

THE 1526 COLLECTION

SO6 EELL, SO5

SO6 EELL

Embellished with the finest hand engraving proudly signed by the author, the SO6 EELL Premium Grade sidelock shotgun is sought after by connoisseurs who desire to be one of the few to own such a masterpiece. Pick one up and you know it is special—each of its elegant details, from the sophisticated engravings to the gold-inlaid animals to the dimensions of the walnut briar stock and receiver, is executed to suit the personal tastes and requirements of its owner. The Master Gunsmiths' handwork is evident everywhere, from the hand-cut deep diamond checkering to the hand-file cut ventilated rib. Prized for their beauty and uniqueness, each SO6 EELL is built to perform to the highest standards decade after decade, generation after generation.

SO5

With numerous gold medals in the Olympics and other prestigious international competitions, the best shooters in the world consider the SO5 over-and-under the finest competition shotgun ever made. The SO5 is handcrafted to meet the requirements of every shooting discipline and can be further personalized for peak performance. This elegant champion's sleek profile enhances swing and pointability. Its sideplates are beautifully hand engraved and the trigger plate is embellished with a 24-carat fine gold inlay of the "P. Beretta" signature on the coin silver finish.

THE 1526 COLLECTION

DT10 TRIDENT EELL, L

DT10 TRIDENT EELL

Competitors feel a special admiration for the shotgun that accompanies them to the podium. Since the beginning of international competition, Beretta has accompanied more medalists than any other brand of shotgun. The DT10 Trident EELL over-and-under was developed for discerning shooters, rolling performance and elegance into a truly durable, secure investment. The perfectly coupled components and the elegant, fully engraved, hand-finished receiver put this shotgun into the exclusive category of a Beretta Premium Grade.

DT10 TRIDENT L

Available with a fine English scroll or with a floral motif engraving with birds on the side panels, this model shows the same attention in the manual working of the whole gun and the same methodical care already reserved to the DT10 Trident EELL.

DT10 TRIDENT L

A true competition overunder with the finish of a deluxe gun, able to satisfy the most discerning shooters.

THE 1526 COLLECTION

GIUBILEO SERIES, 687 EELL CLASSIC

GIUBILEO

The splendid Giubileo over-and-under, made in 12, 20, 28 and .410-gauge models, is distinguished by rich, baroque spiral and floral engravings on the receiver and sideplates, and by its exquisitely proportioned construction. There are no screws on the plates, allowing the Master Engravers to express their artistry in full, while the internal surfaces and mechanisms are impeccably polished. The elongated trigger guard, the safety and top lever are also completely engraved. The stock and fore-end, made from the highest quality walnut, are finely checkered.

GIUBILEO II

Almost five centuries of tradition have produced the elegant lines, rich engravings, innovative technology and superior durability of the side-by-side Giubileo II, masterfully crafted in 12 and 20 gauge. The receiver features side panels that cleverly hide hinges and hinge pins and are applied without screws. The top moldings of the receiver, coined in relief, make this wonderful side-by-side even more slender and elegant. The extended trigger guard, wisely encased within the grip, and the oriented screws immediately show Beretta's care and attention to the finer details.

687 EELL CLASSIC

Refined pleasures are the rewards of life. One of these rewards is hunting with a prestigious Beretta shotgun like the incomparable 687 EELL Classic. The full side plates boast a fine engraving with birds and are enhanced by intricately detailed ornamental motifs of branches, leaves and flowers which extend to the trigger plate, trigger guard and fore-end iron lever.

455 EXPRESS AND SS06 EXPRESS

455 EELL EXPRESS

In designing the 455 EELL Express, Beretta left nothing to chance in ensuring the absolute mechanical and engineering integrity required to handle the specialized loads mandatory for stalking dangerous game — like the receiver made of special high-strength steel and forged with an elongated 60 mm plate to compensate for stress when shooting. Or the reinforced receiver sides that can withstand the tremendous pressure of high-powered cartridges. With the highly detailed game scene engraving and intricate scrolling, this makes for one superbly finished rifle.

SS06 EELL EXPRESS

For dedicated big game hunters worldwide, a Beretta SSO6 EELL Express rifle in the hand means a trophy on the wall. This is no ordinary firearm. The SSO6 EELL Express delivers a potent combination of ultra-strong receiver and carefully crafted barrels to comfortably handle today's powerful ballistics with remarkable accuracy. Hand-finished, hand-checked stocks and fore-ends from highly selected walnut and a color-casehardened receiver sporting 24-carat gold inlaid animals add masterful touches to this magnificent rifle. Hand engraved hunting scenes, on request.

APPAREL AND ACCESSORIES

TAKE ON THE WORLD IN TIMELESS

THIS IS CLOTHING DESIGNED FOR THE DISCRIMINATING MAN, INTERESTED MORE IN GOOD TASTE, TRADITION AND SUPERIOR QUALITY THAN THE LATEST FASHION TRENDS. YOU ARE CONFIDENT IN YOUR OWN STYLE AND RECOGNIZE CLOTHING THAT SPEAKS TO YOUR LIFESTYLE AND EXPECTATION.

THE 1526 COLLECTION IS THE HEART AND THE SOUL OF THE BERETTA FAMILY, PART AND PARCEL OF THEIR PROUD TRADITION OVER THE CENTURIES. THEY CARE DEEPLY ABOUT THE CUT OF THE CLOTH, THE UNWAVERING SENSE OF STYLE AND THE UNFAILING PERFORMANCE PRECISELY BECAUSE THIS IS THE CLOTHING THAT DEFINES THEIR LIFESTYLE.

THEIR SIGNATURE IMPRINT IS ALL OVER EACH OF THESE LUXURY ARTICLES, NOT IN THE FORM OF A TELLTALE LOGO, BUT IN THE MASTERFUL DETAILS THAT SEPARATE THIS COLLECTION FROM THE REST OF THE WORLD.

Our attention to detail and the search for new natural materials come together in this extra-fine Spanish Nabuk coat, which stands in a class of its own. Soft, waterproof and weather resistant. Special surface treatment to prevent water stains. Tone-on-tone corduroy velvet details on the sleeves, pockets, closure and collar. This coat is perfect in the city as in the country with a classic cotton twill pants and a colorful wollen scarf.

**EXCEPTIONAL FURNISHINGS
ZEBRA CHAIR**

Available only by special order in our Gallery stores, this exotic wing chair is fashioned from authentic South African zebra fur including a full mane that wraps over the back. Finely crafted in every detail including brass nail upholstery and carved walnut ball feet.

**PREMIUM GUN ACCESSORIES
GUN MAINTENANCE CASE**

A full range of finely hand crafted cleaning and maintenance accessories, dedicated to the Beretta premium guns care, is exactly lodged in this solid wood case, tan leather covered and red velvet lined.

**GIFTS OF DISTINCTION
PICNIC SET**

A luxury picnic set for outdoor lovers who enjoy style at all times. Painstakingly made by Italian craftsmen, this exclusive leather case contains fine white porcelain cups and plates with gilded edges and stainless steel cutlery and accessories.

EXPERIENCE THE
SHOP BERETTA

THE WORLD OF BERETTA.
DELIVERED
TO YOUR DOOR.

The Beretta lifestyle catalog is about passion. The passion we share for the textures and thrills of the outdoors. The passion we share for the style that speaks of who we are and what we love. This is the complete world of Beretta. Apparel for the hunt and the city. His and hers. Unique gifts, self-indulgent accessories, and much more.

Don't miss out on the experience. Have the Beretta lifestyle delivered to your door* by calling toll-free **1-800-929-2901**, by logging on to **berettausa.com** or by visiting any USA Beretta Gallery.

The Beretta lifestyle catalog. It's like mail-ordering an exciting adventure. To start shopping today, visit **shopberetta.com**

*At this time, the Beretta Lifestyle Catalog can only deliver merchandise to US customers.
